Liquid Zeolite and Zeolite Powder – ZeoliteSupport

ZeoliteSupport provides superior zeolite products.

Liquid Zeolite

admin · Thursday, May 24th, 2012

Liquid Zeolite is the most commonly consumed form of clinoptilolite, the only form of zeolite believed to be safe for human consumption. Zeolite is also found in a pure powdered form, in a zeolite powder blend with other essential ingredients or zeolite capsules with MSM.

Each of these versions have their own reasons to take. You may take both liquid and powdered zeolite together.

Why Liquid Zeolite? We really like the few forms of Liquid Zeolite we carry including Liquid Zeolite Enhanced with DHQ and regular Liquid Zeolite with Fulvic/Humic Acids.

The truth is that all our liquid zeolite supplements contain fulvic acid or some other carrier, trace minerals and other beneficial ingredients to help enhance the zeolite.

Liquid Zeolite is a very convenient way to take an otherwise hard to mix zeolite mineral.

Liquid Zeolite is concentrated.

Taking a combination of liquid and powdered (encapsulated) zeolite may be best for you.

Liquid Zeolite Products: (ranked by number of positive responses)

Liquid Zeolite Enhanced with DHQ (ZeSol) – each serving contains a good amount of high quality DHQ.

Super Z Lite Liquid Zeolite – contains the highest concentration of zeolite in a liquid form.

Ultra Liquid Zeolite Enhanced with DHQ
