ADD/HYPERACTIVITY

HYPERACTIVITY, ACNE

Kathy Reichenbach (writing about her grandson, Braden)

Michigan My grandson, age 16, has had a behaviour problem. His school teacher said, "I don't want him in my class until he is medicated." My daughter put him on Ritalin. We prayed that something natural would take the place of it.

We know that a lot of these disorders are caused by heavy metals.... We know God answers prayer. A few weekends ago, he came to stay with me. We gave him 10 drops of liquid zeolite [cellular zeolite] starting Friday night, at 6 PM. We started giving him 10 drops four times a day. He calmed right out and didn't take his Ritalin over the weekend, as it caused him to have side effects he didn't like.

...My daughter, Angela, asked me, "What did you do to my son? He's in his room multi-tasking." He was fixing his room up. He picked up all his clothes, and was organizing his room. He had never done that.

He had final exams on Monday, four days after we started him on the liquid zeolite. He had to ace his German exam in order to get a passing grade, as he was failing German. Angela asked me what to do. (He had been off the Ritalin all weekend and had taken the liquid zeolite instead.) I said, "Because of the differences we've seen in the three days we've had him, I'd send him to school without the medication. But that's your call."

He went to school without the medication. He called me in the afternoon and said, "Grammy-cat, I aced all my exams."

.... He got straight A's on his report card without the medication. He stayed off his Ritalin after one weekend on the liquid zeolite. Angela has not gotten one call from the teachers saying that he had forgotten to turn in the homework that he had done. Before, calls from the teachers were frequent. I asked Braden to explain how his head feels. He said, "I don't have any more noises in my head. Before when I would try and concentrate, I couldn't concentrate on what I needed to do, there were so many noises. Now I can concentrate." ... It [the Ritalin] gave him a burning stomach and a headache, and that's how he had to go to school every day. He'd feel like a zombie, and still had the noises in his head.... Braden said, "I'd do anything not to have this burning stomach and headache."

This was a month and a half ago. I'm now seeing a very calm boy. He's not so antsy. He would constantly thump his feet when he would sit. He's not doing that now. And he's not constantly popping his fingers.

He now has friends at school. Before nobody wanted to be around him because he was so hyper.... It's his behaviour that is attracting him to the other kids. He's so happy to be invited to birthday parties and other activities.

He said he'd like to bring his friends to meet me at my house. My daughter said their relationship is so much better now because they can talk to each other now. Before it was a constant fight because she'd try to get Braden to do things, and he couldn't put it together how to get it done.

He'd come here and say, "It's just not fun at home.... We fight and argue, and mom doesn't understand."

The last time he came, he said, "Things are so much better at home."

.... Braden is 170 pounds. His acne is totally gone....

He drinks four 16-oz bottles of water a day. We have not put him back on the Ritalin. He is much happier now.

Addiction

ADDICTIONS

Karuna, holistic health consultant (writing about Catherine, whose testimonial follows)
Kauai, Hawaii

I have waited three months to submit this young woman's testimonial – wanting to make sure it was for real. It is. This has huge implications especially here on Kauai, where Ice is an enormous problem with young people. We are also seeing people quickly lose their cravings for sugar, alcohol, and tobacco.

ADDICTION TO ICE (crystal methamphetamine)

Catherine, age 20

Kauai, Hawaii

When I started taking liquid zeolite [cellular zeolite], I was still using ice (crystal methamphetamine). Part of me was trying to break through and be healthy. I could feel the zeolite running inside me and washing the bad away, purifying impurities that were in me.

The physical cravings started to go away. Emotionally, the zeolite made me stable. Using the drug comes from insecurity of something in life, and trying to make everything else go away. The zeolite made me not have the need to be insecure and need the drug. It stabilized something I was missing – physically and emotionally.

Now I don't need the drug at all. The zeolite makes me feel really good. My energy and skin are better. So are my feelings, and my mind. I don't know what it is exactly.

The liquid zeolite helped it be so much easier to come off drugs... I didn't have any withdrawal symptoms getting off the ice. I was in denial about a lot of things in my life that were going on.... Sleep and eating habits are all different when you do drugs or alcohol.

Liquid zeolite brings you back to how good things really are – nutrients in food, for example. I feel like I'm getting everything thing I need. Usually people gain weight getting off drugs. I didn't. I didn't sleep or eat more than I needed to. I didn't crave candies. Before, when I was coming down, I'd crave candy. Before it would sustain me until I had my next fix. I don't crave candy at all now.

I gained weight when I was using because I was eating all the wrong things. My cravings were wrong. Now I crave healthy sugars like papayas, mangos, and watermelon. Things like candy don't taste good to me any more. The zeolite has helped me so much. I've been taking it about three months now. Now I crave the zeolite.

AGENT ORANGE EXPOSURE

AGENT ORANGE EXPOSURE, MENTAL CLARITY, SPIDER BITE, HERPES SIMPLEX

Don K.

Florida

I took some liquid zeolite [cellular zeolite] at 4 pm. When I woke up the next morning, I had a mental clarity that I have never had before, and I still have it. I [was] ... exposed to Agent Orange about 30 years ago.

Two nights later, I had a horrible taste in my mouth. The next morning, I noticed the tumor that was in my mouth for about four years was gone.

A brown recluse spider bit me between the toes 37 years ago. It left an ulcer like a cold sore that never healed, and I have had athlete's foot and other infections around it. On the fourth day, my foot started to itch, and when I looked at it I noticed the ulcer was gone....

Then a herpes cold sore started to form. It never actually went all the way, but went away and after that I noticed that the constant tension that I always had in my lip was also gone. I have been exposed to stress since then that normally would bring on a cold sore, and no more have formed.

For years, I felt like something [was] wrong with my body. I no longer have that feeling. Instead I have an overall feeling of health. This stuff really works!

ARTHRITIS

Rheumatoid Arthritis
Janet Campbell, RN
Illinois

I have suffered from rheumatoid arthritis for well over 20 years and have taken many kinds of supplements. In trying cellular zeolite, I noticed something extraordinary took place. It is my belief that cellular zeolite contains an anti-auto-immune factor. Physically, I felt improved in my entire body, and the relief was not temporary but permanent. This is the first time I've been able to get ahead of the disease process. I take 10 drops in water three times a daily. It is easy to take, and the price is affordable.

AUTISM

AUTISM

Peter Prociuk, M.D.
March 2006

I have about 30 or 40 children who have autism on cellular zeolite. Of these, there is only one child where there is no clear response.

I hear reports from a significant number of parents about the changes they are seeing in their children, such as being able to get rid of the helmet for a child who had to be helmeted, the inactive child becoming active, the non-verbal child becoming verbal, the child who was spinning who's stopped spinning, improvements in attention span and fine-motor activities. I would say I'm hearing results like that where you see a pretty quick response, or pretty quick evidence of detoxification, in probably three-quarters of the children. That's off the top of my head, but I'm getting really positive feedback.

I have one older child on cellular zeolite, and that's the one who hasn't responded. But he was severely affected, and whether he responds in the future remains to be seen. His mother is definitely in it for the long haul. Most of the children – I would say 98-99 percent – are under the age of seven and, as I've said, the vast majority of them seem to be progressing very nicely.

The toxins in these children, in my opinion, have originated largely from over-vaccination. I started using cellular zeolite in this particular group in early December [2005], and I've been extremely impressed with the results. In terms of its ability to remove heavy metals, I think it far exceeds what conventional chelating agents have to offer. cellular zeolite has none of the toxic or depletion issues that chelating agents are known to have, and my personal opinion is that in a fairly short period of time it will become the state of the art method of heavy metal and toxin removal.

One girl, in my opinion, was primarily affected by the MMR vaccine. She was torpedoed at the age of three by the MMR, she regressed remarkably, slowly recovered, and then was re-vaccinated at the age of five last August, and that caused a catastrophic regression. That child had no evidence, to my assessment, of heavy metal involvement, and her measles titers were extremely high. I think they were five or six times the upper limit of

normal. It was pretty clear to me that she was affected more by the biologic aspect of the vaccine than the heavy metals, and her symptoms were incredible hyperactivity. After about two or three weeks on the zeolite, she was notably less hyperactive according to both her parents and her school teacher.

The most challenging issues I think for anyone actively dealing with autism are the refractory cases. There are cases in which you use all the dietary modifications, all the supplements that promote detoxification, and these children don't budge at all. Those are the most disheartening and frustrating cases for the clinician, and obviously especially for the parents. I have two such cases, who didn't respond to transdermal DNPS and a vast array of nutritional supplementation and dietary modification, but who have definitely responded to cellular zeolite. From the onset, on cellular zeolite, they both showed signs of detoxification. That was evidenced by increased lethargy, nausea, vomiting in one case, and also an aggravation of their symptoms. Sometimes, when you start chelating, the children will become more hyperactive or aggressive, and you have to adjust the process accordingly. That happened very quickly with both of these refractory cases. We adjusted the dose of cellular zeolite and, since then, both of them have shown clear signs of improvement in terms of focus, eye contact, and overall level of hyperactivity. Those are the most satisfying cases.

My approach is to first make sure that the nutritional status is improved. Typically, I'll start off with making some dietary adjustments, including probiotics and some nutritional support, and do that for a least a month or so prior to starting any active detoxification. My experience is that the children respond and handle it better as their GI function, diet, and nutritional status are improved.

In terms of dosage, these children are metabolically pretty fragile, so I always start off very low. By low, I mean perhaps 2 drops of cellular zeolite twice a day and gradually work up. Depending on the size of the child, most of them top out at about 5 drops 3 times a day. Some will get up to 10 drops. What I do is continue to increase the dose perhaps every three days or so, depending on the reaction, until there is a clear sign that detoxification is occurring – in terms of increased hyperactivity, nausea, loss of appetite, something that tells me that detoxification is occurring. At that point, I might skip a dose or possibly two, until that reaction settles down, and then resume at the previous lower dose. Then I hold there for perhaps a couple of weeks, and then try and increase again. So I go in a slow, gradual-step manner. I don't think there is any benefit stressing these children out physiologically or the parents emotionally in pushing the detox. If it takes a little longer, I think the benefit of that approach outweighs pushing through a detox reaction and causing a big upheaval in the children's systems and their parents' lives.

I have been using cellular zeolite for about three or four months, and so far I'm extremely pleased – with what the parents are telling me, from what I know about heavy metals, and also really importantly with the fact that the depletion of essential minerals like calcium, magnesium, and selenium is not an issue with cellular zeolite. For me that is really important.

The other issue is cost. Typically a month of transdermal DNPS, for example, can cost between \$100 and \$150, depending on what you use, in addition to the periodic testing

that is required. These children typically don't require very much of the cellular zeolite, and the cost for the parents can be one-third to one-half the cost of DNPS. That is also an obvious benefit.

AUTISM, POOR APPETITE, GASTROINTESTINAL PROBLEMS

Chester and Christine Green (writing about their son Camron)
Massachusetts

My son Camron has been diagnosed as autistic since he was two years old and had stopped talking at that time. Camron is now six years old and he is an affectionate, smart, playful boy. However, he continued to have problems communicating, and overall interacting with others.

The school has been working with him and we had made some progress. Camron had difficulty sitting for long periods of time as well. He had also had stomach problems where he would not eat or become constipated often. It is common in some autistic children to get a condition called "leaky gut" and although we never had him diagnosed for this, Camron was displaying some symptoms by having various stomach issues.

We were introduced to cellular zeolite through a friend and business associate.... He told us he had been using an all natural supplement that safely and effectively removes toxins from the body and he wanted us to try it because it had worked so well for him.

I immediately thought of Camron because we knew that autism could be caused by metals or toxins in the body and since we believed this to be the case with Camron we decided to try it....

Since taking the cellular zeolite (we started Camron on 6 drops 3 times a day), we have been told that Camron can sit for 45 minutes to do class work, is talking more and interacting more with others. He will repeat words back, which is building up his vocabulary. I can hardly keep up with the things he says now because he is observing and imitating the things he sees others do.

As soon as he started taking cellular zeolite, his eating habits automatically improved. Camron has been known to be a pretty good eater so when he would not eat much or not at all on a particular day, we knew that something was wrong. Before he would ... even skip lunch at school sometimes.

With the cellular zeolite he has a healthy appetite again and no more stomach pains or problems. We are so grateful to have been introduced to cellular zeolite. Not only did Camron not have any bad reaction to it, it is odorless and tasteless so we would put it in any drink or food without Camron knowing. This worked out perfectly because Camron is very sensitive to certain food texture and will not eat or drink anything that tastes "funny" to him. We really enjoy the product and will continue to use it for the overall health of Camron and our family.

CANCER

MALIGNANT UTERINE CANCER

Dr. Elizabeth Webb (writing about her mother)

April 2006

My mother was diagnosed with stage-3B uterine cancer in October 2005. The malignancy had extended through the uterine wall, engulfing the right ovary, and through the cervix so that it was directly visible on examination. She decided against conventional therapy and wanted to pursue only supportive measures with nutrients and detoxifying natural agents.

In mid November, she started taking 15 drops of cellular zeolite. Within days, the frequent urination, bladder discomfort, and bloody vaginal discharge that the tumor mass had caused began to recede. A repeat examination by her oncologist revealed that the vaginal extension of the cancer had completely resolved after three weeks.

By mid January, all her symptoms had disappeared, and she felt a totally renewed sense of health and well being. In addition to the remarkable improvement in the cancer, her type-2 diabetes also resolved itself during the same period.

She plans to continue taking cellular zeolite for the remainder of her life. She is due for a PETSCAN soon, and I will keep you updated with further results.

LUNG CANCER

Carol Topham

Livingston, Texas

I was diagnosed with lung cancer in July 2004. I decided a long time ago that if I ever got cancer, I would not allow them to do radiation or chemotherapy. So the only option that I had was surgery or natural health. I opted for natural health. I took a product that seemed to be keeping the cancer the same size but was not shrinking it. Needless to say, my family, after a year of this, was getting quite nervous. They were all quite insistent that I allow them to do the surgery....

I was in the hospital for nine days, was sent home with shingles on the right side as well as ... severe neuropathy in my right arm and right chest area. I had let a friend of mine know that if they found anything that was natural to let me know, as the doctors were very insistent that I was going to have to have radiation and chemotherapy, both of which I had vowed not to do.

I found out after the surgery that I still had cancer in my chest wall and that is why they were so insistent about my doing the chemotherapy and radiation. Several months went by.... A dear friend of mine introduced me to zeolite [cellular zeolite]. It was just about the time that a hurricane came through the area that I live in. The hospital canceled all appointments, and I left town. I took the zeolite as soon as I got it.... 15 drops four times a day for three weeks. I had some major detoxification symptoms, which included flu-like symptoms. I ran a fever and was quite ill for a couple of weeks. But I had a goal, and my feeling was that the discomfort was well worth the end results.

When I went back to the doctor, he did not say a word about the treatments that he had insisted that I take before. I asked him why, and he told me that they could find no sign of cancer. I told him what I had taken, and then he said that he wanted a P.E.T. scan. This particular scan will find cancer if there is any at all.... I told him that I would do that but that he would not find cancer.

When I went back for the results of that test, there was no sign of cancer. I have scans and x-rays every three months so that the doctors feel better about the fact that I no longer have cancer.

It has been a year since my surgery and two years since the diagnosis, and I am cancer free. The only thing I did was take zeolite.

LYMPHOMA

Dr. Dane Silva (writing about a patient)

During the past few months that she's been on cellular zeolite, my patient with lymphoma has experienced a dramatic decrease in the sizes of multiple tumors. These tumors were on the sides of her neck, under her armpits, in the groin, and scattered across the abdomen. These tumors were painful because they blocked lymphatic circulation, and created numbness and tingling due to compression of nearby nerves. Whereas they appeared to be about the size of her fist a few months ago, they are no longer visible today.

MALIGNANT MESOTHELIOMA (LUNG CANCER)

Larry Benjamin
Jemison, Alabama
December 2005

On October 14, I was diagnosed with malignant mesothelioma (lung cancer) caused from asbestos in the lung. I had it in both lungs so surgery was not an option for treatment and this type of cancer doesn't respond to chemo or radiation treatment. I was told I was in the 4th stage and when I asked the doctor how many stages there were he told me there were four. That's basically a death sentence for me. After all testing was completed, CT scan, lab work, tissue biopsy, and a PET scan, I was told by the oncologist that there was nothing he could do for me and he referred me back to my medical doctor for the final care.

On October 31, I started taking cellular zeolite, 15 drops 3 times a day. The second day of my taking cellular zeolite I started to have different sensations in the tumor on my back that was protruding through the chest wall. Sensations like a numbness, to jelly-like when I walked, to bee stings and painful, to a stretching feeling at the tumor, each day it was a different feeling.

After two weeks on the cellular zeolite, a tumor in my upper abdomen which was about the size of a ping-pong ball was now the size of a marble. In the third week of cellular

zeolite that tumor could not be found and the tumor on my back was almost gone. At the time of my appointment with the oncologist the tumor mass on my back could not be found.

...On December 7, I had a follow up CT scan done, and it confirmed that the two tumors were gone. Some were smaller in the lung and one was slightly bigger. I have increased my times I take the cellular zeolite to every 4 hours, 24 hours a day. The new tumors leave the body first, the older more established tumors go last. It is imperative that the blood circulation be increased so that the cellular zeolite can reach all the tumor cells. I am vigorously exercising more and more to accomplish this.

METASTASIZED CERVICAL CANCER

Keiko, age 72
September 2005

At the end of Oct. 2004 (11 months ago), Keiko was diagnosed in Japan with class-3 cervical cancer. At the recommendation of her doctors, she underwent 28 rounds of radiation therapy. At the end of those treatments her doctors told her they had eradicated the cancer in her cervix. Keiko's daughter, Felice, had a recommendation from her doctors here in Hawaii that Keiko should really have a PET scan in Japan to check and make sure it hadn't spread anywhere else. It had indeed metastasized to every lymph node in her body.

Felice brought her mom to Hawaii in June of this year and the oncologists here said this was an extremely aggressive form of cancer. A CAT scan showed two more spots (on her lung and on her stomach) in addition to everything else. They would try eight rounds of chemotherapy to put off what seemed imminent – but the prognosis was grim. They didn't expect her to live even a year.

By the fifth round of chemotherapy, Keiko was so sick (nausea, vomiting, and diarrhea) they decided to stop – that was three weeks ago. Instead they kept praying and kept using the natural supplements.

Five weeks ago a friend told Felice and her mom about cellular zeolite. Keiko took it for a week before she had to stop to accommodate the fifth round of her chemo schedule. This time she got so sick from the chemo she and her daughter decided to stop the treatment right in the middle of the round ... and they continued with the cellular zeolite 15 drops 3x/day starting the next day.

Three weeks later (Monday this week), Keiko had a follow up contrast dye CAT scan. When they walked into her doctor's office, he asked how she was feeling and what she'd been eating, and had a sort of perplexed look on his face. They didn't know what to expect, but hoped and prayed there would be some positive news. Keiko didn't just have a report that was good, it was beyond all expectations – the doctor told Keiko and Felice there was not one single sign of cancer anywhere in her body. Not in any of the lymph nodes, not on her lung or stomach. Stunned, Keiko's daughter even asked the Doc, "Are you sure? Who actually read the CAT scan?" and he reassured her it was definitely the

expert, the radiologist, not just him! He was amazed too, and said that less than 20% of his patients ever have such a thing happen, that even if there was great improvement they usually see some residual cancer still in the body, but there was nothing here. Nothing. And the nurses were crying with emotion when they spoke with Felice and Keiko. As you might expect, he asked her what she was doing. Felice told him and the nurses [about cellular zeolite]....

Keiko will have another CAT scan in three months to confirm she is truly out of the woods and meantime she will be taking her cellular zeolite every day!

BLADDER CANCER

Ron Weitz (writing about his father-in-law Carl)

September 2005 Last January (2005), my father-in-law had another surgery for bladder cancer. In this and the previous surgeries, tumors were found and treated. Since last January, he has worn a catheter bag to collect his urine.

A few months ago his catheter bag began to have blood in it. He continued to pass more and more blood, accompanied by a foul odor. After testing his urine and blood, his doctor told him the cancer was back. The doctor explained that radiation treatments would likely follow the surgery, and maybe chemotherapy after that. Surgery was scheduled for Friday Sept. 2nd .

On Saturday, August 20th, we got some cellular zeolite to him. In FOUR DAYS, the bleeding STOPPED and the catheter bag remained clear of any blood.

After a week on cellular zeolite, he woke one morning and his catheter bag was full of a sticky ugly gunk, and had a terrible odor. The catheter bags and tubes could not be cleaned, and had to be discarded and replaced.

From that point on, there has been NO blood or odor in his catheter bag. Friday, September 2nd, Carl underwent surgery. His doctor was surprised to find NO Tumors in his bladder! He said he was just sure there would be tumors there. Carl has also experienced an increase in energy since taking the cellular zeolite.

LEUKEMIA, PNEUMONIA

Jim Pirtle (written about Jim by a friend) I had a friend in MD Anderson Cancer Center in Houston, Texas with leukemia, and he was coughing continuously from pneumonia. ... Last Thursday he started taking 15 drops three times a day of the cellular zeolite product. The first day he completely stopped coughing. The doctor said, "Do not stop the drops." He left the hospital today in remission and is now an out patient. He will continue the drops faithfully.

LEUKEMIA, THROAT CANCER, SKIN CANCER

Susie (writing about her father)

Wichita, Kansas My dad has CLL leukemia, emphysema, and just recently diagnosed with cancer in his throat. After five weeks of taking cellular zeolite, his leukemia counts are

much better. His oncologist was quite pleased and said he would be able to by-pass chemo for at least two months because of his improved blood counts. When Dad told him that he had been taking cellular zeolite, Dr. Johnson said he was familiar with the zeolite product and recommended for him to stay on it.

The following week, Dad went to his throat doctor, and when the doctor looked in his throat with a scope, he could not believe what he saw. He said it looked so much better than when he observed it eight weeks before. Dad said his throat is no longer sore and feels much better. We believe that cellular zeolite is making a tremendous difference in Dad's health and are very thankful. My mom has started taking the product as well. She was also amazed at how the product has improved my dad's complexion, as he has many skin cancer spots from overexposure to the sun as a farmer. We so appreciate you taking the time to share ... cellular zeolite with us. It has been a huge difference in better quality living for my dad, and possibly his life! We will keep you updated on future improvements! Thanks again.

PROSTATE CANCER

John Huber I was told I had cancer in June 1997. The doctor told me he would take out my prostate and do radiation therapy. At that time, I decided not to do this therapy.

I changed doctors and started eating healthy foods and taking a lot of vitamins.... We tried many different vitamins but none lowered my PSA [or helped my] cancer.

When [I heard] about cellular zeolite, I got excited. I bought a bottle that Wednesday night and took one dose. I took the product for the next four days. On Monday, I had a fasting blood test. On Tuesday, my doctor called with the results. My PSA went from 11.4 down to 4.6, my cholesterol went from 216 to 181, and my sugar went from 190 to 116. My doctor told me he has to do these results again next month to confirm them. We are very happy with cellular zeolite. Thank you.

COLON CANCER, PAIN

Shirley Mulliken (writing about her daughter)

My daughter was diagnosed with colon cancer in January of 2004. After a nightmare of chemo, radiation, and a severe staph infection, she had finally arrived at a place where she was able to function but still not feeling well. Two weeks ago, I was visiting her and noticed that she seemed to be in pain when she sat down. I was very concerned because I thought that indicated that the tumor was growing again. One week ago today, I took a bottle [of cellular zeolite] over to her.... Her legs were aching badly.... I told her to take 15 drops of cellular zeolite 3 times a day. After five treatments, her legs felt better. Five days later, the pain in her legs was gone. I believe cellular zeolite is an answer to prayer.

THROAT CANCER, SHOULDER PAIN

Patient of Dr. Philip

Hopewell Junction, New York

Dr. Philip, a doctor from Hopewell Junction, NY, decided to try the cellular zeolite on one of his patients that currently has throat cancer. He reported this morning that the patient's pain has diminished considerably, and her energy levels are up, much to his surprise. It is too early to tell any oncology results, but he is hopeful. He also has been taking the product, and he had a prior injury to his right shoulder where he could not lift it above his head. He doesn't know how this worked, but after being on the cellular zeolite product for a short time, he is able to lift his arm over his head. He has been "pleasantly impressed" with ... the results so far.

MELANOMA, BREAST LUMPS

M.L. Nebraska

We're water skiers. At the end of August, I had an aggressive form [of melanoma] on my arm. It had satellited already. It was like a mosquito bite that you scratch and it doesn't heal up. The doctor said, "I don't need to biopsy it, I know what it is, and it needs to be cut out." I had heard of the product [cellular zeolite]. I took it in my mouth, and put it on the spots. In three days, the spots were in recovery, and in 10 days the stuff underneath was gone. I dropped down to a maintenance dose, 3 drops 3 times a day for about 3 ½ weeks....

A few days later, I choked on some water, and patted myself on the chest, and found what we women dread. It scared me to death when that popped up. I showed my husband. We did an exam, and found another spot about two inches under the other one. I put the band-aids [with cellular zeolite on] on – one on each bump. I started taking 15 drops 3x/day. Immediately I could see the hard bumps coming to the surface, rising up like a volcano, and the skin was thinning. There was no fluid around it. It was just this really hard place. As I continued putting the drops on it, I didn't go to the doctor Monday as we had planned. I decided to give it a few more days, and see what developed. Monday night I went to bed. In the middle of the night I woke up, it was itching so bad. I scratched it through the band-aid, and ... plink. It rolled off my chest and onto our wrought iron bed ... tink, tink, tink.

The other one came out about 20 minutes later, and that one I held in my hand. (I never found the first one that fell on the floor). I put more drops on both band-aids. By the next night they were completely covered over. I don't have a scar. You can't even see where they were.

My doc wasn't surprised I didn't come in. He knows I'm allergic to every drug. He said, "We call that 'walling up'." The band-aid had a little round circle of blood. That's it. The tumor just walled up and came out.

Within a week, a mass came up on my breast, the size of the end of my thumb. (We had examined my breasts right after the bumps came out, and didn't find anything.) For years, I've had a hard, thick place on my breast, that didn't show up in mammograms. It felt hard like the joint of your thumb. It got smaller and smaller. I kept a band-aid on

that one with cellular zeolite on it. When I talked to my buddy, the doc, and asked what he thought, he said, "I gotta tell ya, I've never felt that your breasts were less lumpy on an exam than they are now.".... I had no detox symptoms. Now we have to do prevention for a lifetime. Every day when I put my skin care products on, I put a drop of the cellular zeolite in the lotion, and in my sunscreen....

kidney papillary type II cancer

Testimonial from a Houston, Texas Meeting Another older man with kidney papillary type II cancer – an aggressive cancer (MD Anderson Cancer Center here in Houston says, "We can't do anything for that type of cancer") – his lymph nodes were growing big time. They were going to give him chemo anyhow. He was on the product three weeks prior to his next check up. Doctor wouldn't admit it, but his lymph nodes were down so low that they couldn't even measure their size.... Most of the lymph nodes were HALF the size they were three weeks prior! Lymph stable, no more cancer. POWERFUL! Three weeks on cellular zeolite and the nodes have shrunk. ...They did a scan on this gentleman and three weeks did it again ... it "assumes that there is no more cancer" according to the doctor.

FIBROUS Breast TISSUE, POSSIBLE CANCER, PAIN

Lana J. Ford, PhD, OTR/L, FAOTA, CBT

October 2005

Due to my own complicated unresolved health issues, in the early '70s, I chose to end my pursuit of health through the traditional medical approaches. Taking on the responsibility for my own health, I chose instead to explore other options – typically those concerned with the "mind-body connection." Since that time, I completed a PhD in physiology, neurology, and psychology – ever seeking answers to my own illusive health history. After a 20-year career as an academic professor, I changed my focus to alternative and complementary care. Since then, I have completed post-doctoral studies in quantum physics and have been an instructor with several bioenergetic modalities.

Several years ago, I noticed that I was having an increase in fibrous tissue of my left breast. Given my background, I preferred not to have mammograms; rather [I] had assessments with energetic modalities, pulled blood work, and had urine tests for heavy metals. I also had moderate to severe pain in the shaft of both femurs, the long leg bones; and suspected heavy metal accumulation. All tests were positive for earmarks of cancer – highly acidic urine, pain that does not go away, loss of appetite, the presence of heavy metals (despite having had 29 mercury filings removed three years ago).

Several weeks ago, I heard about cellular zeolite from a colleague. I ordered the product immediately. Being aware of my own ability to handle detox, I began taking the maximum dosage of 15 drops 3 times a day. I did this on a cross-country drive from North Carolina to Arizona – a trip from October 4th to October 7th, which hints at poor hydration, not the most nourishing diet, and a disruption of sleep patterns. After the first 36 hours, I noticed I no longer had any pain in my breast, and the "lumps" were subsiding. After 48 hours, I not only had no pain in my breast or my legs, but my breast returned to a

soft structure with no lumps or palpable fibers. More remarkably, by the end of the fourth day, I had a sudden revelation that I no longer "had" cancer, I had no thoughts or fears that I did so. I mention this, because over the years, I have taken lots of products for detox, have used herbal supplements, taken antioxidants, explored meditation, toning, and other modalities associated with eastern medical practices. Taking cellular zeolite was the first time I had taken a product specifically targeted at a physical issue that had profound changes both mentally and emotionally.

It is a pleasure to share my experience and trust others will be willing to share their stories.

DOG'S CANCER

Sam, a 15-year-old golden retriever (written by his human companion)I have an elder golden retriever, Sam, who is 15 years of age. On August 16, 2005, he was diagnosed with cancer in the sinus cavity area. The vet explained that Sam was at the latter stages of his cancer and we should plan to put him down. They gave us four days of antibiotics for the associated infection. He could not breathe normally or without difficulty and blood was continually coming from his nose. The reason for the four days was due to the plans to spend time with him and put him down on the fourth day, Saturday, August 20, 2005. I had just received my supply of the cellular zeolite. I decided to try the product with my dog, Sam. I figured that there was nothing to lose. I gave him 6 drops on his tongue 3 times per day. I started on Wednesday, August 17, 2005. By August 19, the blood had stopped coming from his nose and he was breathing easier. On August 20, 2005, Sam stopped just lying on his bed and was up and around running in the back yard taking the other dogs toys to play with. Sam has continued to survive and has continued to run and play. I realize he is 15 years of age and will not live too much longer. However, I believe that the cellular zeolite is incredible in that it lengthened Sam's life.

HORSE MELANOMAS

Joyce Jackson (writing about her work with horses)My work is in animal rehabilitation and conditioning. I'm an equine strengthening specialist. I work with ... whole animal health programs. I've been a barrel racing competitor, and finalist in National Rodeo Finals.I do a lot of work with gray horses. They have a significant number of benign melanomas. We've been using cellular zeolite internally and topically, and the melanomas are disappearing. Their pH is becoming balanced. I have a test group, 1/3 of a group of gray Arabian horses are on the cellular zeolite. It's phenomenal how they are progressing. Metal toxins can be from preservatives in vaccines. We have horses that we haven't found anything to help with mercury in their cells. With the cellular zeolite we're getting dramatic results. One little horse almost died at two weeks of age, he had lethal amounts of mercury from a vaccine. We just maintained him, but issues weren't addressed. We put him on cellular zeolite and in two weeks he tested clean of mercury.

CYSTS AND TUMORS

histiocytoma
Mark McManis
Lone Tree, Colorado

After hearing about the success of cellular zeolite in regard to getting rid of warts, I decided to try it on a benign fibrous tumor called a histiocytoma, which I have had on my leg for about three months. I used 1 drop daily on the tumor, and within 10 days it was gone.

CYSTS

Linda

I have a propensity to [develop] cysts ... I've had a couple removed from my face. About three weeks ago, I noticed that I had a raised area on one side of my nose (right about where my glasses sit). At first, I thought it was just from my glasses, but after awhile I realized that it was another cyst. It continued to grow, and I began to think about going to a plastic surgeon to schedule the removal.

To make a long story short, I decided to put a few drops of the cellular zeolite on it. I figured it couldn't hurt. I did this morning ... the cyst is almost gone this afternoon. I'm a pretty skeptical person. Ha, I'm a very skeptical person. I don't know if it was a coincidence.... All I know is the growth that I was worried about is for the most part gone, and that makes me very happy.

fibrocystic breast tissue

Nancy J.
North Dakota

I have fibrocystic breast tissue; my breasts are usually tender and lumpy to touch. My doctor has been watching a lumpy area to my right breast. I had a needle biopsy in July and a breast exam to recheck the area in October. I began using liquid zeolite [cellular zeolite] about three weeks prior to my breast exam. I noticed my breasts were much less tender and lumpy. During the exam, my doctor was unable to find the lump.

PAINFUL TUMOR

Nelta T.
Iowa

I was scheduled for surgery on the 12th of December. Prior to using liquid zeolite [cellular zeolite], the tumor was the size of a goose egg. It was hard and very painful for me to sit. Thanks to this liquid zeolite, I have cancelled my surgery. The tumor is next to nothing. After only three days, the mass started to soften and lessen in size. I am so incredibly happy that I gave this product a chance. I have been taking 10 drops 3 times per day.... Now after ONLY A WEEK, I have cancelled my surgery!

DEPRESSION

HEPATITIS C, SEVERE DEPRESSION

Peter Fullwood, age 55

Whidbey Island, Washington

I became aware that I had hepatitis C through a medical procedure in March of 2000. At that time, I had a low viral count and a low enzyme count. Over the years, I started catching more and more flus and colds, my joints were aching, and my legs were tired all the time. I became very depressed and withdrawn from people. It has been a very difficult time for me.

In these last four years of my life, my wife died, and I lost our 100-acre ranch. I went to the doctors and they started treating me for hepatitis C with Interferon. At that point, I got sicker and sicker and lost weight – going from 198 to 159 pounds. I'm 6' 1", so I was down to skin and bones and was bedridden. I was unable to eat due to being nauseous all the time. Severe depression, anxiety, homicidal and suicidal thoughts set in. I was crying all the time.

I had a floor and wall covering business with four employees – I was so sick I had to lay them off and walk from my business ... actually it was more like crawling away! At that point, I had almost given up when my friend ... came over and introduced me to the supplement, cellular zeolite. I had tried so many products ... and I felt like I had heard it all, and so I was skeptical. However, I decided I wanted to try this one due to my friend's enthusiasm – she was bubbling over. Although she has also been suffering from hepatitis C, there were obvious changes in her physical appearance and overall health and attitude. I didn't have the money to even try one bottle, but she offered to leave me a bottle because she cares about me and she said, "That's what friends are for." I started with the product that evening – 10 drops 3 times a day.

Words can't describe what I experienced even the first few days. That first day, I sweated a lot, and felt like I was peeing out 90-weight oil. That evening, I sweated profusely – it was as if someone had thrown buckets of water under the blankets on me. The next few days, I started detoxing through my natural bodily functions. I don't wish to offend anyone by getting too graphic, but suffice it to say the strange smells and colors that came out of me were quite unusual!

Next, it started working on my mental faculties, and for me that was truly magic (it is still happening). The depression, anxiety, homicidal and suicidal tendencies vanished – in its place have appeared a very strong sense of spiritual, emotional, and physical well-being. I feel like I've had a complete metamorphosis in my life and have not felt this good in 20 years.

I keep asking myself, "Can I actually continue feeling better and better every day?" After just one week, I was feeling much better and had considerable energy, so I started to lay some floors again so I could purchase some more of this product.

My joints no longer ache, and the metal plate in my left forearm that used to ache all the time (especially in the cold) is no longer a problem – even in the cold. I also am healing faster. For example, yesterday I burned myself some time around noon while tending my

fireplace. The burn was 1/2 inch by 1/2 inch square. It had a blister and had begun to scab over last night. Now it is pink – it has healed in just one day!

Just the other day, I went to the lab for blood work, and when looking over the results my doctor said, “Your liver functions are only mildly abnormal.” A little over two weeks ago, I had been a candidate for a liver transplant with a severely swollen and sick liver (again, I have only been on the product a couple of weeks).

As a result of my remarkable experience with this new “lease on life,” I am now wanting to change the focus of my life work from helping people by installing their flooring, to helping save people’s lives ... taking part in the giving of the gift of good health.

MENSTRUAL PAIN, DEPRESSION, ANXIETY

Nancy Ericksen, age 51
Bellevue, Washington

May 2006 I started taking liquid zeolite around mid-April 2006. Before that, I thought I was pretty normal and in good health even though I had on-going prescriptions for high blood pressure, high cholesterol, depression, acid reflux, and sinus issues. Denial is pretty insidious!

I was also diagnosed with ADD (Attention Deficit Disorder) when I was 38 years old. Due to some intensive and specific ADD therapy and biofeedback training, I was able to stop taking medication for that about 10 years ago. However, when I get too stressed out, a lot of the symptoms resurface.

However, with all those things going on, they didn't bother me as much as another problem – my menstrual periods. They've been abnormal all my life. There would be at least one day each month when I'd wish I was dead due to horrendous cramps. I was so miserable, lying in the fetal position – in excruciating pain – sometimes for three days in row. Through the years, I tried many natural remedies, over-the-counter drugs, and prescriptions, but nothing really helped.

A lot of jokes are made about PMS (pre-menstrual symptoms), but neither PMS nor my period were amusing when I was in the midst of experiencing them. My husband usually knew that my period was coming on before I did, since my symptoms would rear their ugly head and change my personality dramatically – and especially toward him. After starting liquid zeolite, my first flow was extremely heavy. It also came as a surprise, since there were none of the symptoms I'm used to experiencing prior to my periods, such as headaches, lower back pain, sleepiness, and the horrendously crabby attitude. I've been peri-menopausal for the past couple years, so it wasn't that unusual to have a heavy period. However, when there was heavy bleeding in the past, it was always accompanied by debilitating cramps that were worse than normal. This time, I kept waiting for them to start, but instead, I had no cramps at all! That was the most amazing news for me – the cramps were gone! Another strange side effect was that my flow had a heavy metallic odor that I'd never experienced before.

I've been plagued with depression for quite a while, but it had gotten much worse in the past two years. Although I'd attempted several behavioral changes to make myself get up and stay out of bed, I'd always revert back to my old ways unless I had an appointment of some kind. When my husband was away on a trip, I was totally unmotivated to do much of anything other than sleep and lie around. Because of liquid zeolite, I've now weaned myself off of my anti-anxiety pills and no longer have to take my acid reflux medication because I feel so good. My husband noticed that change even after my first day of taking the drops. He thought I seemed so much more "happy." It felt great to know that I wasn't the only one noticing a difference! I wake up each day now with purpose. I get up and stay up as soon as I wake up. I'm excited to work on different projects – especially my home.

I don't know how to explain the feeling – it's not euphoria – it's just a feeling of well being. I actually feel motivated and energized. What a switch! I can't wait to get tested and see if there's been a change in my cholesterol and blood pressure numbers! This product is awesome! Thank you!

DES EXPOSURE

DES EXPOSURE, SILICONE BREAST IMPLANT TOXICITY, HEAVY METAL POISONING

Marie DeArmon

Rogersville, Missouri

October 2005

When my mother was pregnant with me, she was given a drug called DES that resulted in numerous birth defects and devastating health consequences throughout my life. In 1982, when I was a 27-year-old mother of two small girls, I was diagnosed with cervical cancer, which was caused by the DES. Being a nurse, I chose traditional medical treatment, and a year later I was in very grave condition.

I quickly became open to alternative forms of medicine to restore my health.... I felt I could no longer return to my traditional nursing profession, and instead became certified in a wide variety natural health modalities. In 1984, I opened a wellness center specializing in nutrition, high quality supplements, various therapies, heavy metal detoxification, and immune system support. Even with all of my training, experience, wonderful products, and healing devices, I have lived everyday of my 51 years with pain in my body and very fragile health.

Another one of the effects that the DES caused was severe breast deformities. When I was 17, I had massive reconstructive surgery, after which they tried to make me "more normal" by placing silicone breast implants. By the age of 40, I was almost dead with chemical and heavy metal poisoning from the implants.

For several years, I was so chemically reactive that I had grand-mal seizures from even minor chemical exposures (perfume on someone else, exhaust fumes in traffic, etc.). As a result of exposure to DES in the womb, heavy metal and chemical poisoning from the

implants, and heavy metals from amalgam dental fillings, I have spent the past 22 years trying to find ways to detoxify my body safely – a dangerous situation with impaired kidney and liver function and severe neurological problems.

In late August, I received a call from my good friend ..., asking me to take a look at a product called cellular zeolite. He wanted my feedback because he knows I only work with the "best of the best and purest of the pure." After reviewing the research, I was amazed – I'd never seen anything that could safely detoxify heavy metals, even from people like me! ...

The day after I received my cellular zeolite, two of my grandkids came down with a flu virus that had taken another grandchild almost two weeks to recover from. Their temperatures soared to almost 106 degrees. I gave them each three drops of cellular zeolite and, within 20-30 minutes, I could feel their fevers melt away. The next day, they were up and about, fully recovered!

My personal experiences with cellular zeolite have been remarkable! About a year and a half ago, I sustained a severe injury to my leg and had to have surgery.... While the surgery allowed me to regain my mobility, it left me with residual pain, inflammation, and swelling; I was still taking pain medication several times per week in order to sleep at night with the pain. It also triggered many of my old symptoms of severe imbalance and toxicity; I was in bed much of the past year. I had come to the difficult realization that I may not ever really be much better and that I needed to retire due to my health challenges. After one dose of cellular zeolite, the pain in my leg was reduced by 75%, and after four doses it was completely gone; I haven't needed take any pain medication since. In many ways, since I have been taking cellular zeolite, I feel better than I ever have in my life! For the first time ever, I am able to safely move the toxins out of my system without life-threatening consequences.

I am so grateful for this product and the opportunity to share it with my friends, family, and clients! I feel honored to be part of the company that will get this product into the hands of so many that can benefit from it. In the 31 years I have been a nurse, 22 years as a natural health practitioner, and 15 years of being the Missouri Coordinator for the Dental Amalgam Mercury Syndrome, International Organization, I have never seen a more important product to get into the hands of everyone that I know!

DIABETES

DIABETES, HEPATITIS C, HIGH BLOOD PRESSURE

Ken Cunningham, age 72

Cincinnati, Ohio

May 2006

In mid-February, I started taking cellular zeolite (15 drops 4x/day) and switched to a raw organic diet. My results have been nothing short of mind blowing. In 10 weeks, I've reversed my high blood pressure and diabetes, and I'm also in the process of reversing my hepatitis C.

One week after I began taking cellular zeolite, I noticed that my blood pressure started to drop. You don't want your blood pressure to go over 130, but I could never get mine that low. It was almost always over 150. After I started on cellular zeolite, it started to decrease and is always below 130 now, which means that I don't have high blood pressure anymore.

My blood sugar also dropped. The normal range for a diabetic is between 90 and 120. Mine was always above 120, except if I couldn't eat for a few hours, in which case it would drop below 90 and I would feel violently ill. I would have to stop at a neighborhood store or anyplace I could and buy a banana or a candy bar and eat it, just to get my blood sugar up. I was not insulin-dependent, but I was taking Glucophage twice a day. I noticed that in that same week after I started on cellular zeolite, my blood sugar started going down. It's now stabilized right around the 70s and 80s, which means that I'm not a diabetic anymore.

I also had the worst kind of hepatitis. It's the least able to be cured. The normal range for liver enzymes is from 0 to 5,000. The enzymes in my liver were 1,700,000. That's right – 1,700,000. I was in stage two of liver cirrhosis. I may have picked up hepatitis C when I was in the Coast Guard. I was in search and rescue, and we used to pick up dead bodies at sea without wearing protective clothing. My doctor at the VA hospital has been trying to get me to take interferon, which is very unsatisfactory. You have to take shots every week, plus it's long term, and makes you feel like you've got the flu. Then it's effective in only 40 percent of cases. So I knew that I didn't have many options. I had to stop screwing around with my diet and take the cellular zeolite, or I'd have to have a liver transplant and then take lots of medication for the rest of my life.

About two weeks after starting on cellular zeolite, my enzymes started to drop. They soon dropped almost 90 percent to 184,000. I maintained the diet and the cellular zeolite, and a few weeks later, they decreased to 5,700. My VA doctor has told me that he will be shocked if I am able to get my enzyme count below 5,000. My target by mid-September is to have them down between 600 and 1,000, without taking interferon.

As if all this wasn't enough, I've also lost 35 pounds, and I needed to lose weight. I feel absolutely fantastic now. I have so much energy. I'm interested in work, in play, in sex. I don't take any medication any more, either for high blood pressure or for diabetes. Any one of these results would have been a gift, but to have all these outcomes, particularly at my age, is a full-blown miracle.

COMPLICATIONS FROM DIABETES, CHRONIC PAIN

Mark Manning, age 46

I am a 46-year-old male who has had a very successful career as a professional tennis coach, an outstanding and long-term volunteer for the USTA NorCal Tennis Association and the Elmhurst Tennis Center, and a commercial driver for the past 20+ years. My eyes and feet were the cornerstone of my continuing in these lucrative businesses. However, the last six years of my life have been plagued with many health disorders. These include

cancer and diabetes, which caused the rapid deterioration of my body. These conditions worsened after 2003, so much so that I developed

Neuropathy in both feet

A massive edema problem in my lower extremities

A loss of clear vision at night, which forced me to abandon all night driving whatsoever

Ringing sensations in my ears

Bleeding gums

Impotency

Mood changes, reflecting increasingly aggressive behavior

Ongoing chronic pain syndrome that worsened at night and made sleeping an impossibility.

Things dramatically changed for me when a friend recently gave me four bottles of cellular zeolite on December 15, 2005 and told me to try it.... Doctors and various hospitals previously had advised me that they could not cure my ailments and that I had merely one year left to live. I had sought out other holistic remedies that proved the doctors wrong but these remedies really didn't cure the problem.... To my amazement, within one week of starting to use [cellular zeolite], I noticed a lack of pain at night. By week number two, no more bleeding gums. By week number three, I began to notice significant changes with my edema and neuropathy.

... I decided ... to put some drops in my eyes and on the thinning area of my head. The results have been nothing short of incredible. I am now able to enjoy and engage in driving at night again. My hair has not returned to its full nature, but it is starting to sprout!

Within four weeks of trying this product, I started to play tennis again with my students and even sprint, and at times I outrun them! Within five weeks, I felt like a kid in a candy store. My impotency has disappeared. The edema is gone. The neuropathy has improved so significantly as to be almost not noticeable, and I have so much energy that I am not only sprinting but I have begun jumping rope and am considering returning to my youthful days by starting Disco roller skating again!... The greatest benefit that I have noticed from using ... cellular zeolite is that I am more at peace with myself, and the aggressive behavior has begun to subside. I wish to thank God for restoring my life and allowing [my friend] to introduce me to this truly remarkable product....

FIBROMYALGIA

FIBROMYALGIA

Peggy Ann

April 2006

I want to thank you for getting me started on the liquid zeolite drops [cellular zeolite]. As you know, I have been such a believer in medication due to being a nurse, and I have been leery of taking ... "wonder" medications.... Let me tell you that this was the best

decision that I have made....

I was diagnosed with fibromyalgia and thought this was going to change my entire life, and it did. I let this disease run my life instead of me running the disease. I was having so many problems with my daily living that there were days that I could hardly make it out of bed, let alone to work. I missed so much work that I was on the verge of losing my job, so I was literally dragging my body to work ... and was late a lot.

I was in constant pain no matter what drugs I took.... I would go to the doctor and say I was having this or that problem, and their answer was, "Here, take this other medication." I was taking 15 different medications a day just to get through an eight-hour day at work. I then would come home, put on my P.J.'s, and not get off the couch. My husband had to do all the work around the house, because I hurt too much to do anything.... My hands hurt lifting a glass of water.

Your joints are what this disease hits first, and then it moves on to the other body parts. Think of the most pain you have ever had, and double that on a daily basis. On a scale of 1-10, with 10 being the worse, getting out of bed was a 10. About noon, you are down to about a 7, but come bedtime, you are back to a 10. There were times that I would just sit there crying because nothing was working. I was so drugged up that I was worthless to everyone, and here I was making life decisions for other people, but I could not take care of myself....

Then I started the liquid zeolite drops, and it was a new beginning to life. It only took a couple of day before I started to notice changes. I was not in constant pain, [and] the pain level was down to about a 5....

Then I started to notice other changes in my life. I could get out of bed and make it to work on time, if not before time. Then my hair started to look lively again. I thought, WOW, things are changing. I wonder if I could stop some of my medications. The first to go was the pain medication. I still need Tylenol every once in a while, but I truly think that will change. I have also cut back on my psychotropic medications. I found that I was not as depressed now that I could function again.

I have also begun to cut back on my blood pressure medication.... My blood pressure is better now than it has been in years. I am thinking maybe I can start getting off more and more meds. I know that I have to do it a little at a time, but I am looking forward to the time that I will be drug free.

I have the energy to be with my husband and take care of the house again. I can concentrate at work and not worry that I am making bad decisions, because I am no longer working in a drug-induced fog. Co-workers are noticing the change in me, and you bet I tell them about cellular zeolite.

Liquid zeolite has made a big difference in my life. When I started noticing the big changes in me, I started making sure that my husband takes liquid zeolite daily. There has been a change in him as well. I have noticed that he does more around the house, and he

is getting more accomplished at work as well.

My pain level now is about a 3 in the mornings, and then about noon I do not even notice pain. I feel so much better that I am really looking forward to our fishing trip in a couple of weeks.... I do not know how to thank you for getting me started on cellular zeolite. I am enjoying life again. I think everyone who has fibromyalgia should be on this product....

Thank you for my life back.

FIBROMYALGIA, CANDIDA

Suzy S.

Kauai, Hawaii

April 2006 I am a Licensed Vocational Nurse, who ran a private care management service for seniors and family members for 25 years. It was a 24/7, high-stress, life-and-death nursing practice. I was diagnosed with fibromyalgia and high mercury levels four years ago. I was so bad, at my worst, that I got lost in my own neighborhood. That's how bad the effect of the mercury was. I was mapped by a rheumatologist in San Diego four years ago. I had 18 points. I had been helped by a holistic practitioner, whom I am very grateful to. I got all the mercury out of my teeth – correctly. I was on chlorella, changed all my personal care items to healthy ones, and sold my nursing business to reduce the stress in my life. However, my improvement had reached a plateau. I still had very low energy, and nothing seemed to change that.

I started cellular zeolite a month ago – 5 drops, 3 times a day. My goal was to get help with my fibromyalgia. I also had a high level of candida according to tests. In the last few weeks, I've noticed I have more energy, and I am thinking more clearly than I was. I think I'm more optimistic.

I did experience some nausea in the first few days, which passed after a few days. I also realized I was dehydrated, though I thought I was drinking enough. Then I noticed that I had a lot more energy. Usually by 9 PM, I'd be done for the day. Now I'm painting in my studio at night. Before, I was too exhausted to do that.

My sleep is better, and I'm dreaming more. I've had a lab test for neurotransmitters. This tells us whether there's a physical problem keeping us from sleeping. The doctor who read that test said there's no way I could be sleeping at night, according to my brain chemistry. I started taking a supplement about five months ago with 5HTP, GABA, and thiamine to help my sleep. I still was having some sleep problems when I started cellular zeolite. My sleep has improved in the last few weeks since I've been taking cellular zeolite.

I normally haven't been in pain for the last two years, though before then I had a lot of pain. In the past, however, whenever I would have a massage, I would have a lot of pain with pressure. I would literally kick the masseuse and scream. It's been probably about 20 years that I haven't been able to be touched deeply.

Now, since I've been taking cellular zeolite, I can have a deep massage without any pain. I look forward to seeing what further improvements I'll experience.

My latest stool test, which was approximately two weeks after starting cellular zeolite, had NO candida! This is the first time in years!!!! The other treatments were rough and not effective. My doctor was pleased and ... said for me to keep taking cellular zeolite! (Like I would stop!?)

Fibromyalgia, PAIN

Michelle Stange, age 33

Los Angeles, California

I have been suffering from what has now been diagnosed as fibromyalgia. My symptoms are joint pain in various places, fatigue, exhaustion, and depression. I have tried everything to get better: massages, herbs, acupressure, acupuncture, glucosamine. Nothing worked for me. I finally tried cellular zeolite. I started taking it a little bit each day – 15 drops, 3x a day. That was about two-and-a-half weeks ago. After the first week, I started to feel OK, but had a bit of a red, flushed feeling. Within one week, I started to feel great. Then I ran out of the cellular zeolite, and noticed immediately that my symptoms returned. I called my ... rep frantically on 11/7 to overnight me more cellular zeolite. She got it to her within two days, and I was thrilled. It's about eight days later, and I no longer have any joint pain, and can't remember the last time I felt this good.

FLU, COLDS, AND RESPIRATORY PROBLEMS

EMPHYSEMA

Lynn Harrisberger (writing about her stepmother, Delora)

September 2005

On August 15th, I shared the information on cellular zeolite (cellular zeolite) with my dad. I knew he would want to give cellular zeolite to his wife, Delora, who went through a bout of breast cancer last year, 2004. Delora had one breast removed during her bout with cancer. She also went through radiation and chemotherapy. Before the cancer and now afterwards, her main health problem has been and still is emphysema. Her constant companion has been an oxygen canister, which she carries with her everywhere she goes. After only four days of taking 6 to 9 cellular zeolite drops 3x daily ... Delora has been able to move around (walk) more and become a bit more active than before ... and even leave the oxygen bottle behind while she is doing so. She is excited about the improvement and looks forward to even better days now.

LEUKEMIA, PNEUMONIA

Jim Pirtle (written about Jim by a friend) I had a friend in MD Anderson Cancer Center in Houston, Texas with leukemia, and he was coughing continuously from pneumonia.... Last Thursday he started taking 15 drops three times a day of the cellular zeolite product. The first day he completely stopped coughing. The doctor said, "Do not stop the drops." He left the hospital today in remission and is now an out patient. He will continue the drops faithfully.

COLDS, FLU, INCREASED IMMUNITY

Bob Dilworth

A funny thing has happened to me. My immune system has been extremely weak the last couple of years. After age 65, it seemed I was getting my share and everyone else's share of colds and sore throats. When I noticed that liquid zeolite [cellular zeolite] supported a healthy immune system, I immediately started taking it.

Over the last three months of rain and unusual coldness in the Pacific Northwest, I have not come down with any cold or flu-like symptoms, even though I have been in close contact with friends and grandchildren who had colds, flu, and upper respiratory problems. When I start feeling that something is trying to grab me, I immediately drop three drops on my tongue and swallow. And when I swallow, my throat seems to immediately react favorably to the drops.

Although I take liquid zeolite three times a day, I sense that the bedtime dosage and early morning dosage is most effective for me.

I am quite skeptical by nature, but this stuff is all it's cracked up to be. I am a believer!

UPPER RESPIRATORY CONGESTION, CONSTIPATION

Dr. France, D.C. (writing about a patient)

Clearwater, Florida

A lady has been suffering for a few days of nasal congestion, runny nose, had lost her voice, and her chest was congested. She took 10 drops of a liquid zeolite [cellular zeolite] in the morning, and by the afternoon her voice was back, her nose was cleared, and three days later her chest was completely normal. Also, for the first time in years, she was able to have a daily bowel movement.

GASTRO-INTESTINAL PROBLEMS

ACID REFLUX

Mark Thompson

Michigan

In 1975, when I was 17 years old, I was taken to the doctor by my parents to be tested for a burning sensation in my throat and chest. I was taken through a series of tests, which concluded with an upper GI. I was told at that time that I should begin taking Maalox several times a day, not to eat Italian or Mexican foods, and to stay away from fast food restaurants. (Tell that to a 17 year old). Within a couple of years I discovered Roloids, and then I found Tums. They were my life saver. I have taken Tums for the last 27 years. Every pair of pants I own has a roll of Tums in the pocket. I purchased Tums by the 100-count bottle. My wife has a special Tums container in her purse just in case I misplace mine or run out. And, because I very often would have to deal with terrible heartburn in the middle of the night, I actually would place a couple of Tums on the edge of my dresser before going to bed.

My doctor has repeatedly informed me that I needed to be on an acid reflux prescription. After searching for an alternative to starting the eventual journey to a handful of

prescriptions a day, I was told about [cellular zeolite]. I received my first bottle of cellular zeolite on December 24 and began taking it three times a day, three drops at a time. At that time, I had half of a roll of Tums in my pocket. Today that half roll of Tums sits on my microwave. I have eaten tacos, Buffalo hot wings, baked spaghetti, pizza, and of course an amazing Christmas dinner just 18 hours after starting the drops of cellular zeolite. I have not needed or taken another Tums since....

HEARTBURN AND ACID REFLUX

Bodhi Downer
Kauai, Hawaii

November 2005 I have noticed a drastic change in my heartburn. After the first day I took [cellular zeolite], I was already feeling better. Right then and there, I was won over. Before, I would get acid reflux and pain from many foods, not just the foods that I'm not to eat. Sometimes things like tomato sauce or pizza would give me heartburn as it's going down. Non-acidic foods like bananas or vegetables would come up as acid after I ate them.

After taking 3 drops of the cellular zeolite 3 times a day, NO FOODS GAVE ME HEARTBURN unless I lied down right after eating them.

Last night, I ate two Taco Bell burritos and lied down right afterwards and experienced heartburn. I took the cellular zeolite, and it decreased the pain and burning feeling slowly, and I woke up feeling fine. Normally, I would wake up feeling nauseous if I ate too soon before going to bed.

I can feel it de-acidifying my stomach. I believe long-term use of this product, combined with a healthy diet, will heal my esophagus and keep me disease free.

HEARTBURN

Becky Grisolano
Kirtland, New Mexico

It all started 28 years ago, when I became pregnant.... Well, after the baby was born, [my] heartburn did subside.... After some time, the symptoms started again, and this time they were getting worse. I started on Tums, Roloids, etc. This seemed to help solve the problem for years. As I got older, the symptoms exceedingly got more frequent and severe. I would wake up in the middle of the night where I could not get my breath, I felt as though I was suffocating for air. The acid was so severe it would make me regurgitate everything I had eaten. Instead of one or two tablets like the directions called for, I was up to four to six tablets every hour. I would get relief and feel better. Now the pills were not helping, only throwing up everything would relieve the pressure and nauseating feeling. I was getting to the point I did not want to eat because I was afraid of the symptoms that were to follow. I could not go through the agony. One day, my husband told me about this product ... cellular zeolite. I immediately told him I would like to try it.... You get to a point that you will just about try anything for relief.... I immediately found relief the first day. After a week, my assistant who works with me and should know me after three

years, told me my mood was even milder. . . . I have been relieved of severe acid reflux. I stopped for about a week because of things that had happened in my life, and I immediately had acid reflux. So when you start, you keep taking it faithfully. It really has been a life saver to me, and I tell everyone about this amazing product. I was a little surprised at the little bottle and the drops only look like water, but the unbelievable results in that little bottle is for me.

Esophageal Reflux

bob Hood

I received a sample bottle of the cellular zeolite at the beginning of July and have been "rationing" it by taking only 3 drops once a day vs. the recommended 3 times a day until the product begins shipping in August.

I suffer from esophageal reflux (a pouch in the esophagus that can collect food). In reading the Zeolite White Paper and noticing that zeolite has been effective in reducing gastric reflux, it dawned on me that I have not been having the frequency of reflux issues!

I cannot wait to get my product next week so I can begin taking the recommended dosage. Based on the results so far, I am convinced it will virtually eliminate my reflux issues. Thanks for bringing such a product to market.

GASTRIC REFLUX DISEASE

Lisa

Tulsa, Oklahoma

I have pretty symptomatic GERD (gastric reflux disease). I have DEFINITELY noticed a change since I've started using cellular zeolite (about three weeks ago). I still take Zantac, but have been able to back off from 20 mg Prilosec daily. I am excited!

UPPER RESPIRATORY CONGESTION, CONSTIPATION

Dr. France, D.C. (writing about a patient)

Clearwater, Florida

A lady has been suffering for a few days of nasal congestion, runny nose, had lost her voice, and her chest was congested. She took 10 drops of a liquid zeolite [cellular zeolite] in the morning, and by the afternoon her voice was back, her nose was cleared, and three days later her chest was completely normal. Also, for the first time in years, she was able to have a daily bowel movement.

AUTISM, POOR APPETITE, GASTROINTESTINAL PROBLEMS

Chester and Christine Green (writing about their son Camron)

Massachusetts

My son Camron has been diagnosed as autistic since he was two years old and had stopped talking at that time. Camron is now six years old and he is an affectionate, smart,

playful boy. However, he continued to have problems communicating, and overall interacting with others.

The school has been working with him and we had made some progress. Camron had difficulty sitting for long periods of time as well. He had also had stomach problems where he would not eat or become constipated often. It is common in some autistic children to get a condition called “leaky gut” and although we never had him diagnosed for this, Camron was displaying some symptoms by having various stomach issues.

We were introduced to cellular zeolite through a friend and business associate.... He told us he had been using an all natural supplement that safely and effectively removes toxins from the body and he wanted us to try it because it had worked so well for him.

I immediately thought of Camron because we knew that autism could be caused by metals or toxins in the body and since we believed this to be the case with Camron we decided to try it....

Since taking the cellular zeolite (we started Camron on 6 drops 3 times a day), we have been told that Camron can sit for 45 minutes to do class work, is talking more and interacting more with others. He will repeat words back, which is building up his vocabulary. I can hardly keep up with the things he says now because he is observing and imitating the things he sees others do.

As soon as he started taking cellular zeolite, his eating habits automatically improved. Camron has been known to be a pretty good eater so when he would not eat much or not at all on a particular day, we knew that something was wrong. Before he would ... even skip lunch at school sometimes.

With the cellular zeolite he has a healthy appetite again and no more stomach pains or problems. We are so grateful to have been introduced to cellular zeolite. Not only did Camron not have any bad reaction to it, it is odorless and tasteless so we would put it in any drink or food without Camron knowing. This worked out perfectly because Camron is very sensitive to certain food texture and will not eat or drink anything that tastes “funny” to him. We really enjoy the product and will continue to use it for the overall health of Camron and our family.

HEAVY METAL POISONING

CONSEQUENCES OF FLU SHOT DURING PREGNANCY

Dr. Peter Prociuk

March 2006

There was a lady who was in her third trimester of pregnancy, who brought her two year old to my office. She had received a flu vaccine that contained 25 micrograms of thimerosal during the pregnancy, and after the vaccine she noticed less fetal movement than before. Because cellular zeolite has this tremendous safety rating, I suggested she take it. She started taking 10 drops 3x day) and, for a week, every time she took cellular

zeolite, she felt a little bit queasy, she felt heat moving through her body for a couple of hours, and her urine became rather rancid during that time. After about a week, these reactions stopped occurring, she felt noticeably better, and the movements of the baby were also noticeably increased. That was enormously gratifying. I think it's pretty safe to say that that child's developmental curve at this point is going to be markedly different had the mother not received the cellular zeolite. To undertake heavy metal removal any other way during pregnancy would raise some really major concerns, which I didn't have using the cellular zeolite.

DES EXPOSURE, SILICONE BREAST IMPLANT TOXICITY, HEAVY METAL POISONING

Marie DeArmon

Rogersville, Missouri

October 2005

When my mother was pregnant with me, she was given a drug called DES that resulted in numerous birth defects and devastating health consequences throughout my life. In 1982, when I was a 27-year-old mother of two small girls, I was diagnosed with cervical cancer, which was caused by the DES. Being a nurse, I chose traditional medical treatment, and a year later I was in very grave condition.

I quickly became open to alternative forms of medicine to restore my health.... I felt I could no longer return to my traditional nursing profession, and instead became certified in a wide variety natural health modalities. In 1984, I opened a wellness center specializing in nutrition, high quality supplements, various therapies, heavy metal detoxification, and immune system support. Even with all of my training, experience, wonderful products, and healing devices, I have lived everyday of my 51 years with pain in my body and very fragile health.

Another one of the effects that the DES caused was severe breast deformities. When I was 17, I had massive reconstructive surgery, after which they tried to make me "more normal" by placing silicone breast implants. By the age of 40, I was almost dead with chemical and heavy metal poisoning from the implants.

For several years, I was so chemically reactive that I had grand-mal seizures from even minor chemical exposures (perfume on someone else, exhaust fumes in traffic, etc.). As a result of exposure to DES in the womb, heavy metal and chemical poisoning from the implants, and heavy metals from amalgam dental fillings, I have spent the past 22 years trying to find ways to detoxify my body safely – a dangerous situation with impaired kidney and liver function and severe neurological problems.

In late August, I received a call from my good friend ..., asking me to take a look at a product called cellular zeolite. He wanted my feedback because he knows I only work with the "best of the best and purest of the pure." After reviewing the research, I was amazed – I'd never seen anything that could safely detoxify heavy metals, even from people like me! ...

The day after I received my cellular zeolite, two of my grandkids came down with a flu virus that had taken another grandchild almost two weeks to recover from. Their

temperatures soared to almost 106 degrees. I gave them each three drops of cellular zeolite and, within 20-30 minutes, I could feel their fevers melt away. The next day, they were up and about, fully recovered!

My personal experiences with cellular zeolite have been remarkable! About a year and a half ago, I sustained a severe injury to my leg and had to have surgery.... While the surgery allowed me to regain my mobility, it left me with residual pain, inflammation, and swelling; I was still taking pain medication several times per week in order to sleep at night with the pain. It also triggered many of my old symptoms of severe imbalance and toxicity; I was in bed much of the past year. I had come to the difficult realization that I may not ever really be much better and that I needed to retire due to my health challenges. After one dose of cellular zeolite, the pain in my leg was reduced by 75%, and after four doses it was completely gone; I haven't needed take any pain medication since. In many ways, since I have been taking cellular zeolite, I feel better than I ever have in my life! For the first time ever, I am able to safely move the toxins out of my system without life-threatening consequences.

I am so grateful for this product and the opportunity to share it with my friends, family, and clients! I feel honored to be part of the company that will get this product into the hands of so many that can benefit from it. In the 31 years I have been a nurse, 22 years as a natural health practitioner, and 15 years of being the Missouri Coordinator for the Dental Amalgam Mercury Syndrome, International Organization, I have never seen a more important product to get into the hands of everyone that I know!

HEPATITIS C

DIABETES, HEPATITIS C, HIGH BLOOD PRESSURE

Ken Cunningham, age 72

Cincinnati, Ohio

May 2006

In mid-February, I started taking cellular zeolite (15 drops 4x/day) and switched to a raw organic diet. My results have been nothing short of mind blowing. In 10 weeks, I've reversed my high blood pressure and diabetes, and I'm also in the process of reversing my hepatitis C.

One week after I began taking cellular zeolite, I noticed that my blood pressure started to drop. You don't want your blood pressure to go over 130, but I could never get mine that low. It was almost always over 150. After I started on cellular zeolite, it started to decrease and is always below 130 now, which means that I don't have high blood pressure anymore.

My blood sugar also dropped. The normal range for a diabetic is between 90 and 120. Mine was always above 120, except if I couldn't eat for a few hours, in which case it would drop below 90 and I would feel violently ill. I would have to stop at a neighborhood store or anyplace I could and buy a banana or a candy bar and eat it, just to get my blood sugar up. I was not insulin-dependent, but I was taking Glucophage twice a

day. I noticed that in that same week after I started on cellular zeolite, my blood sugar started going down. It's now stabilized right around the 70s and 80s, which means that I'm not a diabetic anymore.

I also had the worst kind of hepatitis. It's the least able to be cured. The normal range for liver enzymes is from 0 to 5,000. The enzymes in my liver were 1,700,000. That's right – 1,700,000. I was in stage two of liver cirrhosis. I may have picked up hepatitis C when I was in the Coast Guard. I was in search and rescue, and we used to pick up dead bodies at sea without wearing protective clothing. My doctor at the VA hospital has been trying to get me to take interferon, which is very unsatisfactory. You have to take shots every week, plus it's long term, and makes you feel like you've got the flu. Then it's effective in only 40 percent of cases. So I knew that I didn't have many options. I had to stop screwing around with my diet and take the cellular zeolite, or I'd have to have a liver transplant and then take lots of medication for the rest of my life.

About two weeks after starting on cellular zeolite, my enzymes started to drop. They soon dropped almost 90 percent to 184,000. I maintained the diet and the cellular zeolite, and a few weeks later, they decreased to 5,700. My VA doctor has told me that he will be shocked if I am able to get my enzyme count below 5,000. My target by mid-September is to have them down between 600 and 1,000, without taking interferon.

As if all this wasn't enough, I've also lost 35 pounds, and I needed to lose weight. I feel absolutely fantastic now. I have so much energy. I'm interested in work, in play, in sex. I don't take any medication any more, either for high blood pressure or for diabetes. Any one of these results would have been a gift, but to have all these outcomes, particularly at my age, is a full-blown miracle.

HEPATITIS C, SEVERE DEPRESSION

Peter Fullwood, age 55
Whidbey Island, Washington

I became aware that I had hepatitis C through a medical procedure in March of 2000. At that time, I had a low viral count and a low enzyme count. Over the years, I started catching more and more flus and colds, my joints were aching, and my legs were tired all the time. I became very depressed and withdrawn from people. It has been a very difficult time for me.

In these last four years of my life, my wife died, and I lost our 100-acre ranch. I went to the doctors and they started treating me for hepatitis C with Interferon. At that point, I got sicker and sicker and lost weight – going from 198 to 159 pounds. I'm 6' 1", so I was down to skin and bones and was bedridden. I was unable to eat due to being nauseous all the time. Severe depression, anxiety, homicidal and suicidal thoughts set in. I was crying all the time.

I had a floor and wall covering business with four employees – I was so sick I had to lay them off and walk from my business ... actually it was more like crawling away!

At that point, I had almost given up when my friend ... came over and introduced me to the supplement, cellular zeolite. I had tried so many products ... and I felt like I had heard it all, and so I was skeptical. However, I decided I wanted to try this one due to my friend's enthusiasm – she was bubbling over. Although she has also been suffering from hepatitis C, there were obvious changes in her physical appearance and overall health and attitude. I didn't have the money to even try one bottle, but she offered to leave me a bottle because she cares about me and she said, "That's what friends are for." I started with the product that evening – 10 drops 3 times a day.

Words can't describe what I experienced even the first few days. That first day, I sweated a lot, and felt like I was peeing out 90-weight oil. That evening, I sweated profusely – it was as if someone had thrown buckets of water under the blankets on me. The next few days, I started detoxing through my natural bodily functions. I don't wish to offend anyone by getting too graphic, but suffice it to say the strange smells and colors that came out of me were quite unusual!

Next, it started working on my mental faculties, and for me that was truly magic (it is still happening). The depression, anxiety, homicidal and suicidal tendencies vanished – in its place have appeared a very strong sense of spiritual, emotional, and physical well-being. I feel like I've had a complete metamorphosis in my life and have not felt this good in 20 years.

I keep asking myself, "Can I actually continue feeling better and better every day?" After just one week, I was feeling much better and had considerable energy, so I started to lay some floors again so I could purchase some more of this product.

My joints no longer ache, and the metal plate in my left forearm that used to ache all the time (especially in the cold) is no longer a problem – even in the cold. I also am healing faster. For example, yesterday I burned myself some time around noon while tending my fireplace. The burn was 1/2 inch by 1/2 inch square. It had a blister and had begun to scab over last night. Now it is pink – it has healed in just one day!

Just the other day, I went to the lab for blood work, and when looking over the results my doctor said, "Your liver functions are only mildly abnormal." A little over two weeks ago, I had been a candidate for a liver transplant with a severely swollen and sick liver (again, I have only been on the product a couple of weeks).

As a result of my remarkable experience with this new "lease on life," I am now wanting to change the focus of my life work from helping people by installing their flooring, to helping save people's lives ... taking part in the giving of the gift of good health.

High Blood Pressure

DIABETES, HEPATITIS C, HIGH BLOOD PRESSURE

Ken Cunningham, age 72

Cincinnati, Ohio

May 2006

In mid-February, I started taking cellular zeolite (15 drops 4x/day) and switched to a raw organic diet. My results have been nothing short of mind blowing. In 10 weeks, I've

reversed my high blood pressure and diabetes, and I'm also in the process of reversing my hepatitis C.

One week after I began taking cellular zeolite, I noticed that my blood pressure started to drop. You don't want your blood pressure to go over 130, but I could never get mine that low. It was almost always over 150. After I started on cellular zeolite, it started to decrease and is always below 130 now, which means that I don't have high blood pressure anymore.

My blood sugar also dropped. The normal range for a diabetic is between 90 and 120. Mine was always above 120, except if I couldn't eat for a few hours, in which case it would drop below 90 and I would feel violently ill. My target by mid-September is to have them down between 600 and 1,000, without taking interferon.

As if all this wasn't enough, I've also lost 35 pounds, and I needed to lose weight. I feel absolutely fantastic now. I have so much energy. I'm interested in work, in play, in sex. I don't take any medication any more, either for high blood pressure or for diabetes. Any one of these results would have been a gift, but to have all these outcomes, particularly at my age, is a full-blown miracle.

HIV/AIDS

PAIN AND LOW ENERGY ASSOCIATED WITH AIDS

Gary

Spanaway, Washington

November 2005 I was first diagnosed with HIV in 1986, and developed full blown Aids in 1993 and was medically retired at that time. Right now, I am on the prescription drugs

lamivudine, triprolidine, stavudine, ranitidine, valacyclovir, hydrocodone, methadone, and efavirenz.

I have had neuropathy in my legs since 1995. I think the neuropathy was caused from the drug AZT. I have not been able to spend much time standing or being physically active since that time. I spend most of my time sitting in a chair or laying down to help with the pain. I discussed having my legs amputated with my doctor because the pain is so bad. He said I would still have ghost pain so that would not help.

In 1996, my CD4's (white blood cells) were down to 3, which is near death. I have been using athletic knee supports from time to time since 1997. I went to the doctor in July of 2005 with knee pain and was given a knee brace for my left knee. It has metal supports in it, and it caused a lot of pain.

I started taking cellular zeolite about Sept. 17, 2005. I take 15 drops 4 times a day.

I have dogs that I take on walks everyday just to get exercise. By the time I would get home my knee was in such bad pain I was limping. I started putting a couple of drops of cellular zeolite on my knee before going on my walks. Almost immediately, I noticed less pain in my knee. Within a few days, I was able to take the dogs on walks without the knee brace, and now I am able to run with very little pain. I can also mow my yard without taking a break before I finish. That used to be an all day job. I have a lawn pond that I have dug up and refinished with very little pain. This was a major project. It had more rocks in it than it did dirt. My energy level has increased so much since I have started using this product. I feel very good most of the time without the depression that I have had for years.

I will have blood work done again soon. After I get the results back I am going to talk to my doctor about cutting out or back on my prescription drugs.

KIDNEY STONES

Kidney Stones

Stephen Aiello, M.D. (writing about a patient)

I think I may have stumbled on to a new use for cellular zeolite.... As you may know, I practice geriatrics and internal medicine.... I recommend cellular zeolite to patients who are going to travel or are exposed to closed groups of people ... like teachers or patients visiting family for the holidays.... I have a patient who flies on commercial airlines frequently, and he has had a number of upper respiratory infections this year from this type of exposure.... I told him to go on cellular zeolite to see if we could prevent this.... He also has had multiple episodes of kidney stones over the last 20 years ... he has had to have lithotripsy [crushing of stone by sound waves] and ureterocystoscopies [going through the bladder up the tube to the kidney to remove a stone]. He was told by his urologist that he had a stone wedged in the lower part of the kidney, and he had CAT scans and studies to prove this and to locate the stone.... He was scheduled to have the stone removed, but he set this up a couple weeks after starting the cellular zeolite.... On the morning of surgery, the urologist got an x-ray to confirm that the stone was still in the same place, and ... it was gone.... Now this patient has passed stones before, and he knows it is like trying to pass a piece of broken glass, so he is sure that he did not pass

this stone intact.... On a scientific basis, this seems to make sense to me, because we know the cellular zeolite picks up positively charged particles, and kidney stones are usually made up of debris wrapped in minerals (70% have calcium in them ... that is why you can see most on x-ray). If this turns out to be a new use for cellular zeolite, I can't even express what a medical find this would be.... For most people, the only way to prevent kidney stones is to avoid calcium in their diet, and that is not a good idea for bone strength.... Also, I know that kidney stones and infections are a common problem in small dogs and especially in cats.... I obviously will be using cellular zeolite on any of my kidney stone patients ... especially since there is no down side since it is 100% non-toxic and safe.... I'll keep you posted on my patient's progress and hope others ... find this information helpful....

MENTAL CLARITY

MENTAL CLARITY

M. Murray
Pittsburgh, PA
April 2006

Thank you for telling me about cellular zeolite. Forget about turning a new page or beginning a new chapter. I feel like I've started a whole new book. Some of those things that I've thought about doing for years I'm now doing.

BRAIN FOG

Ronaye Perfitt
Port Coquitlam, B.C., Canada
March 2006

I was born in 1950 in Toronto and have lived in 15+ cities (including in the USA), so I've been around and about, and at times I feel like a walking toxic dumpsite. I started using cellular zeolite on February 9, 2006. After three days of using 10 drops 3 or 4 times a day, I felt like I had taken my brain through a carwash! I really have the experience of what it is like when you are walking through a forest or down by the ocean or after a refreshing rainfall, when you feel revitalized by the negative ions in the air. I have now been using liquid zeolite for 35 days, and I can honestly say each day I am experiencing a little more clarity. The brain fog is lightening up, and there is better brain function happening.

Would I stop using liquid zeolite? Not a chance! Would you stop brushing your teeth? Would you take a break from taking out the garbage?

AGENT ORANGE EXPOSURE, MENTAL CLARITY, SPIDER BITE, HERPES SIMPLEX

Don K.
Florida

I took some liquid zeolite [cellular zeolite] at 4 pm. When I woke up the next morning, I had a mental clarity that I have never had before, and I still have it....

PAIN

PAIN AND LOW ENERGY ASSOCIATED WITH AIDS

Gary

Spanaway, Washington

November 2005 I was first diagnosed with HIV in 1986, and developed full-blown Aids in 1993 and was medically retired at that time. Right now, I am on the prescription drugs lamivudine, triprolidine, stavudine, ranitidine, valacyclovir, hydrocodone, methadone, and efavirenz.

I have had neuropathy in my legs since 1995. I think the neuropathy was caused from the drug AZT. I have not been able to spend much time standing or being physically active since that time. I spend most of my time sitting in a chair or laying down to help with the pain. I discussed having my legs amputated with my doctor because the pain is so bad. He said I would still have ghost pain so that would not help.

In 1996, my CD4's (white blood cells) were down to 3, which is near death. I have been using athletic knee supports from time to time since 1997. I went to the doctor in July of 2005 with knee pain and was given a knee brace for my left knee. It has metal supports in it, and it caused a lot of pain. I started taking cellular zeolite about Sept. 17, 2005. I take 15 drops 4 times a day.

I have dogs that I take on walks everyday just to get exercise. By the time I would get home my knee was in such bad pain I was limping. I started putting a couple of drops of cellular zeolite on my knee before going on my walks. Almost immediately, I noticed less pain in my knee. Within a few days, I was able to take the dogs on walks without the knee brace, and now I am able to run with very little pain. I can also mow my yard without taking a break before I finish. That used to be an all day job. I have a lawn pond that I have dug up and refinished with very little pain. This was a major project. It had more rocks in it than it did dirt. My energy level has increased so much since I have started using this product. I feel very good most of the time without the depression that I have had for years. I will have blood work done again soon. After I get the results back I am going to talk to my doctor about cutting out or back on my prescription drugs.

PAIN AND STAMINA, MASECTOMY SURVIVOR

Sandra Englis

Idaho Falls, Idaho
May 2006

I started taking the Liquid Zeolite last Tuesday, and I started on 30 drops a day. Saturday morning, I took 10 drops in water, and I went into my yard and worked for about an hour and a half. I thought I'd overdone it. I'm a cancer survivor. I had all the lymph nodes removed from my right arm, and usually with a repetitive exercise it swells up in my back, arm, right hand, and down my right side.

Saturday, I was moving hoses, fixing a broken sprinkler, moving various things around the yard. When I came in the house, I felt fine, so after lunch I went out again and weeded and transplanted raspberry plants. I was bent over a lot of the time, and crouching way down...I worried that I wouldn't be able to get up. Four hours later, I was weeding in the flower beds, and I could stand up easily each time to throw the weeds out. I thought, Now I'm probably going to be sore. Then I'd see more weeds and bend over, kneel, or crouch to get them.

I couldn't believe it. I was up and down, and moving easily. Nothing hurt. And I did not swell. My hand didn't swell. There were no sharp pains as it usually happens from the lymph not being able to move adequately.

By then I shouldn't have been able to close my right hand to hold the digger. Usually my right hand and arm would have been in screaming pain, and I wouldn't have been able to close the fingers. My left hand wouldn't have been much better.

My husband is a doctor, and usually would give me Naprosen, a strong anti-inflammatory (same chemical as Aleve) after I work in the garden. But I was fine and didn't need it. I went to bed that night and didn't have to take any pain killers. And I was fine the next morning. The only thing I had was slight soreness in my elbow.

The last time I did a lot of physical work was last Thanksgiving. Then all my joints were sore, my lymph backed up, and I was sore in my back and side from the lymph swelling up. That was just from an hour and a half or two hours of work. My right hand swelled up, and I couldn't use it.

Last Sunday night, I carried a four-month-old baby outside. I'm missing all the muscles on the right side of my chest because they did a radical mastectomy. Normally a baby is too heavy for me to carry without feeling a lot of strain. I carried her out to the car, and I was OK. And that was after that hard day of gardening. To me, that's a big thing in my life. Apparently I can resume the activities that I used to do. It leaves me with a feeling of awe. It's hard to believe it's true, because it's so drastically different. I do feel amazed at the wonderful difference the Liquid Zeolite makes in my body.

COMPLICATIONS FROM DIABETES, CHRONIC PAIN

Mark Manning, age 46

I am a 46-year-young male who has had a very successful career as a professional tennis coach, an outstanding and long-term volunteer for the USTA NorCal Tennis Association and the Elmhurst Tennis Center, and a commercial driver for the past 20+ years. My eyes and feet were the cornerstone of my continuing in these lucrative businesses. However, the last six years of my life have been plagued with many health disorders. These include cancer and diabetes, which caused the rapid deterioration of my body. These conditions worsened after 2003, so much so that I developed

Neuropathy in both feet

A massive edema problem in my lower extremities

A loss of clear vision at night, which forced me to abandon all night driving whatsoever

Ringing sensations in my ears

Bleeding gums

Impotency

Mood changes, reflecting increasingly aggressive behavior

Ongoing chronic pain syndrome that worsened at night and made sleeping an impossibility.

Things dramatically changed for me when a friend recently gave me four bottles of cellular zeolite on December 15, 2005 and told me to try it.... Doctors and various hospitals previously had advised me that they could not cure my ailments and that I had merely one year left to live. I had sought out other holistic remedies that proved the doctors wrong but these remedies really didn't cure the problem.... To my amazement, within one week of starting to use [cellular zeolite], I noticed a lack of pain at night. By week number two, no more bleeding gums. By week number three, I began to notice significant changes with my edema and neuropathy.

... I decided ... to put some drops in my eyes and on the thinning area of my head. The results have been nothing short of incredible. I am now able to enjoy and engage in driving at night again. My hair has not returned to its full nature, but it is starting to sprout!

Within four weeks of trying this product, I started to play tennis again with my students and even sprint, and at times I outrun them! Within five weeks, I felt like a kid in a candy store. My impotency has disappeared. The edema is gone. The neuropathy has improved so significantly as to be almost not noticeable, and I have so much energy that I am not only sprinting but I have begun jumping rope and am considering returning to my youthful days by starting Disco roller skating again!... The greatest benefit that I have noticed from using ... cellular zeolite is that I am more at peace with myself, and the aggressive behavior has begun to subside. I wish to thank God for restoring my life and allowing [my friend] to introduce me to this truly remarkable product....

SHOULDER PAIN

Dr. Philip

Hopewell Junction, New York Dr. Philip, a doctor from Hopewell Junction, NY ... has been taking the product, and he had a prior injury to his right shoulder where he could not lift it above his head. He doesn't know how this worked, but after being on the cellular zeolite product for a short time, he is able to lift his arm over his head. He has been "pleasantly impressed" with ... the results so far.

COLON CANCER, PAIN

Shirley Mulliken (writing about her daughter)

My daughter was diagnosed with colon cancer in January of 2004. After a nightmare of chemo, radiation, and a severe staph infection, she had finally arrived at a place where she was able to function but still not feeling well. Two weeks ago, I was visiting her and noticed that she

seemed to be in pain when she sat down. I was very concerned because I thought that indicated that the tumor was growing again. One week ago today, I took a bottle (of cellular zeolite) over to her. When I got over there, she told me her legs were aching badly.... I told her to take 15 drops of cellular zeolite 3 times a day. After five treatments, her legs felt better. Five days later, the pain in her legs was gone. I believe cellular zeolite is an answer to prayer.

FIBROUS Breast TISSUE, POSSIBLE CANCER, PAIN

Lana J. Ford, PhD, OTR/L, FAOTA, CBT

October 2005

Due to my own complicated unresolved health issues, in the early '70s, I chose to end my pursuit of health through the traditional medical approaches. Taking on the responsibility for my own health, I chose instead to explore other options – typically those concerned with the "mind-body connection." Since that time, I completed a PhD in physiology, neurology, and psychology – ever seeking answers to my own illusive health history. After a 20-year career as an academic professor, I changed my focus to alternative and complementary care. Since then, I have completed post-doctoral studies in quantum physics and have been an instructor with several bioenergetic modalities.

Several years ago, I noticed that I was having an increase in fibrous tissue of my left breast. Given my background, I preferred not to have mammograms; rather [I] had assessments with energetic modalities, pulled blood work, and had urine tests for heavy metals. I also had moderate to severe pain in the shaft of both femurs, the long leg bones; and suspected heavy metal accumulation. All tests were positive for earmarks of cancer – highly acidic urine, pain that does not go away, loss of appetite, the presence of heavy metals (despite having had 29 mercury filings removed three years ago).

Several weeks ago, I heard about cellular zeolite from a colleague. I ordered the product immediately. Being aware of my own ability to handle detox, I began taking the maximum dosage of 15 drops 3 times a day. I did this on a cross-country drive from North Carolina to Arizona – a trip from October 4th to October 7th, which hints at poor hydration, not the most nourishing diet, and a disruption of sleep patterns. After the first 36 hours, I noticed I no longer had any pain in my breast, and the "lumps" were subsiding. After 48 hours, I not only had no pain in my breast or my legs, but my breast returned to a soft structure with no lumps or palpable fibers. More remarkably, by the end of the fourth

day, I had a sudden revelation that I no longer "had" cancer, I had no thoughts or fears that I did so. I mention this, because over the years, I have taken lots of products for detox, have used herbal supplements, taken antioxidants, explored meditation, toning, and other modalities associated with eastern medical practices. Taking cellular zeolite was the first time I had taken a product specifically targeted at a physical issue that had profound changes both mentally and emotionally. It is a pleasure to share my experience and trust others will be willing to share their stories.

Fibromyalgia, PAIN

Michelle Stange, age 33
Los Angeles, California

I have been suffering from what has now been diagnosed as fibromyalgia. My symptoms are joint pain in various places, fatigue, exhaustion, and depression. I have tried everything to get better: massages, herbs, acupuncture, acupressure, glucosamine. Nothing worked for me. I finally tried cellular zeolite. I started taking it a little bit each day – 15 drops, 3x a day. That was about two-and-a-half weeks ago. After the first week, I started to feel OK, but had a bit of a red, flushed feeling. Within one week, I started to feel great. Then I ran out of the cellular zeolite, and noticed immediately that my symptoms returned. I called my...rep frantically on 11/7 to overnight me more cellular zeolite. She got it to her within two days, and I was thrilled. It's about eight days later, and I no longer have any joint pain, and can't remember the last time I felt this good.

PMS/Menstrual PAIN

PMS

Marie-Aude Preau
Oregon
April 2006

I have been taking cellular zeolite for the last seven weeks with numerous successful results, and I recently had a wonderful experience. In my early life, I never had any PMS, and never understood what this really meant, but in the past 10 years, I got my share of pre-menstrual syndrome. Three to five days prior to my monthly cycle, I would have very angry thoughts and heavy depression. I felt awful, hating everyone including myself and not being able to control these thoughts – even though I try to keep a healthy lifestyle with exercise, contemplation, and spiritual pursuit. These thoughts would be my cue in knowing that my cycle was around the corner. This month, for the first time, I was taken by surprise! It was only after the fact that I realized I was menstruating. I was shocked to see that I had no warning of any kind – emotional instability, painful cramps, or awful thoughts. It was clear then that none of these feelings were me or coming from me, but instead were only the result of being toxic and having being exposed to toxicity and heavy metals that ended up being stored in my body over the years. I now know that I have a choice and can live a toxic-free life. I don't have to store these dangerous metals or pollutants in my body anymore and can lead a healthy lifestyle while being in an increasingly toxic world!

MENSTRUAL PAIN, DEPRESSION, ANXIETY

Nancy Ericksen, age 51
Bellevue, Washington

May 2006 I started taking liquid zeolite around mid-April 2006. Before that, I thought I was pretty normal and in good health even though I had on-going prescriptions for high blood pressure, high cholesterol, depression, acid reflux, and sinus issues. Denial is pretty insidious!

I was also diagnosed with ADD (Attention Deficit Disorder) when I was 38 years old. Due to some intensive and specific ADD therapy and biofeedback training, I was able to stop taking medication for that about 10 years ago. However, when I get too stressed out, a lot of the symptoms resurface.

However, with all those things going on, they didn't bother me as much as another problem – my menstrual periods. They've been abnormal all my life. There would be at least one day each month when I'd wish I was dead due to horrendous cramps. I was so miserable, lying in the fetal position – in excruciating pain – sometimes for three days in row. Through the years, I tried many natural remedies, over-the-counter drugs, and prescriptions, but nothing really helped.

A lot of jokes are made about PMS (pre-menstrual symptoms), but neither PMS nor my period were amusing when I was in the midst of experiencing them. My husband usually knew that my period was coming on before I did, since my symptoms would rear their ugly head and change my personality dramatically – and especially toward him.

After starting liquid zeolite, my first flow was extremely heavy. It also came as a surprise, since there were none of the symptoms I'm used to experiencing prior to my periods, such as headaches, lower back pain, sleepiness, and the horrendously crabby attitude. I've been peri-menopausal for the past couple years, so it wasn't that unusual to have a heavy period. However, when there was heavy bleeding in the past, it was always accompanied by debilitating cramps that were worse than normal. This time, I kept waiting for them to start, but instead, I had no cramps at all! That was the most amazing news for me – the cramps were gone! Another strange side effect was that my flow had a heavy metallic odor that I'd never experienced before.

I've been plagued with depression for quite a while, but it had gotten much worse in the past two years. Although I'd attempted several behavioral changes to make myself get up and stay out of bed, I'd always revert back to my old ways unless I had an appointment of some kind. When my husband was away on a trip, I was totally unmotivated to do much of anything other than sleep and lie around. Because of liquid zeolite, I've now weaned myself off of my anti-anxiety pills and no longer have to take my acid reflux medication because I feel so good. My husband noticed that change even after my first day of taking the drops. He thought I seemed so much more "happy." It felt great to know that I wasn't the only one noticing a difference! I wake up each day now with purpose. I get up and stay up as soon as I wake up. I'm excited to work on different projects – especially my home.

I don't know how to explain the feeling – it's not euphoria – it's just a feeling of well being. I actually feel motivated and energized. What a switch! I can't wait to get tested and see if there's been a change in my cholesterol and blood pressure numbers! This product is awesome! Thank you!

MENSTRUAL CRAMPS, SKIN BLEMISHES

Katy Boyer
Casper, Wyoming
May 2006

I just have to share with you the changes I've noticed since beginning the Liquid Zeolite. I know there is a lot of information on serious health concerns such as cancer, autism, and fibromyalgia. But what about the regular person ... like me? Well, removing the toxins from my body has resulted in two changes that I never thought could happen.

During my teen years, I, like most everyone, had to deal with skin blemishes – not only on my face, but also on my back and shoulders. Unlike many others, mine have persisted into my thirties. Didn't matter how clean my face was, I've always dealt with them. Since starting the liquid zeolite product six weeks ago, I've noticed a reduction in the number, size, and recurrence of the nasty things. I'm no longer stuck in adolescence!!

Another area that has been difficult for me is menstrual cramps. I've had serious cramps my whole life except for a couple of years after I had my daughter – sometimes bad enough they cause me to vomit. The last few years, the only way to cope was to take three Advil together with two Aleve, two to three times a day the first two days. So, I wouldn't be wracked with pain, but thinking clearly was out of the question and energy was very lacking. I was basically a walking half-zombie for at least one day a month. Not so last week (April 2006)! I was pleasantly surprised when the pain never materialized!! For the first time that I can remember – NO CRAMPS!!! I was a functional human being instead of the zombie. It was awesome! Every woman should be taking the Liquid Zeolite for this reason if no other.

SILICONE BREAST IMPLANT TOXICITY

DES EXPOSURE, SILICONE BREAST IMPLANT TOXICITY, HEAVY METAL POISONING

Marie DeArmon
Rogersville, Missouri
October 2005

When my mother was pregnant with me, she was given a drug called DES that resulted in numerous birth defects and devastating health consequences throughout my life. In 1982, when I was a 27-year-old mother of two small girls, I was diagnosed with cervical cancer, which was caused by the DES. Being a nurse, I chose traditional medical treatment, and a year later I was in very grave condition.

I quickly became open to alternative forms of medicine to restore my health.... I felt I could no longer return to my traditional nursing profession, and instead became certified

in a wide variety natural health modalities. In 1984, I opened a wellness center specializing in nutrition, high quality supplements, various therapies, heavy metal detoxification, and immune system support. Even with all of my training, experience, wonderful products, and healing devices, I have lived everyday of my 51 years with pain in my body and very fragile health.

Another one of the effects that the DES caused was severe breast deformities. When I was 17, I had massive reconstructive surgery, after which they tried to make me "more normal" by placing silicone breast implants. By the age of 40, I was almost dead with chemical and heavy metal poisoning from the implants.

For several years, I was so chemically reactive that I had grand-mal seizures from even minor chemical exposures (perfume on someone else, exhaust fumes in traffic, etc.). As a result of exposure to DES in the womb, heavy metal and chemical poisoning from the implants, and heavy metals from amalgam dental fillings, I have spent the past 22 years trying to find ways to detoxify my body safely – a dangerous situation with impaired kidney and liver function and severe neurological problems. In late August, I received a call from my good friend . . . , asking me to take a look at a product called cellular zeolite. He wanted my feedback because he knows I only work with the "best of the best and purest of the pure." After reviewing the research, I was amazed – I'd never seen anything that could safely detoxify heavy metals, even from people like me! . . .

The day after I received my cellular zeolite, two of my grandkids came down with a flu virus that had taken another grandchild almost two weeks to recover from. Their temperatures soared to almost 106 degrees. I gave them each three drops of cellular zeolite and, within 20-30 minutes, I could feel their fevers melt away. The next day, they were up and about, fully recovered!

My personal experiences with cellular zeolite have been remarkable! About a year and a half ago, I sustained a severe injury to my leg and had to have surgery. . . . While the surgery allowed me to regain my mobility, it left me with residual pain, inflammation, and swelling; I was still taking pain medication several times per week in order to sleep at night with the pain. It also triggered many of my old symptoms of severe imbalance and toxicity; I was in bed much of the past year. I had come to the difficult realization that I may not ever really be much better and that I needed to retire due to my health challenges. After one dose of cellular zeolite, the pain in my leg was reduced by 75%, and after four doses it was completely gone; I haven't needed take any pain medication since. In many ways, since I have been taking cellular zeolite, I feel better than I ever have in my life! For the first time ever, I am able to safely move the toxins out of my system without life-threatening consequences. I am so grateful for this product and the opportunity to share it with my friends, family, and clients! I feel honored to be part of the company that will get this product into the hands of so many that can benefit from it. In the 31 years I have been a nurse, 22 years as a natural health practitioner, and 15 years of being the Missouri Coordinator for the Dental Amalgam Mercury Syndrome, International Organization, I have never seen a more important product to get into the hands of everyone that I know!

SKIN CONDITIONS

MENSTRUAL CRAMPS, SKIN BLEMISHES

Katy Boyer
Casper, Wyoming
May 2006

I just have to share with you the changes I've noticed since beginning the Liquid Zeolite. I know there is a lot of information on serious health concerns such as cancer, autism, and fibromyalgia. HYPERACTIVITY, ACNE

Kathy Reichenbach (writing about her grandson, Braden)

Michigan My grandson, age 16, has had a behaviour problem. His school teacher said, "I don't want him in my class until he is medicated." My daughter put him on Ritalin.... A few weekends ago he came to stay with me. We gave him 10 drops of liquid zeolite starting Friday night, at 6 PM. We started giving him 10 drops 4 times a day....

This was a month and a half ago.... His acne is totally gone.... He drinks four 16-oz bottles of water a day. We have not put him back on the Ritalin. He is much happier now.

WART AND ANOTHER SKIN GROWTH

Anna Cunningham, age 8
Kauai, Hawaii

November 2005 My name is Anna Cunningham. I'm eight years old. I had a wart on my thumb the size of a pencil eraser for about five months. It was ugly, and I didn't like it. I was biting the skin around it, so that the skin around it was pink and raw. I didn't like people to see it.

My daddy gave me 4 drops 3 times a day of the cellular zeolite. Sometimes he'd put it on top of the wart. Then it got smaller and smaller, and then it was gone. Now you can't

even see where it was. That took about two weeks.

There was another bump that was around my fingernail on my other hand. It was bloody, and a brownish-red color. It was nasty. After about three weeks taking the cellular zeolite and putting it on the bump, I peeled it off. The skin underneath was rosy and healed when it peeled off. I like the cellular zeolite. I put it in my family's water pitcher in the fridge when my dad went away. I take it every day because it's good for me.

SKIN LESIONS, ITCHINESS, CONTACT DERMATITIS

Romy Salazar
California

I have been suffering from never-healing lesions on both my legs for the past so many years. Worst of all, I could be very uncomfortable because I was also bothered with a never-ending itchiness on my legs. On top of that, I cannot wear many of my favorite watches (I love to collect and wear different watches) because they leave me with skin eruptions and itchiness on my wrist.

I have received different prescriptions from different doctors I have approached about these skin problems. I was told that I have poor blood circulation as a result.

I took the cellular zeolite as soon as it was available. AND I saw a dramatic change with my skin problems just after a week of using the cellular zeolite. I noticed that the lesions on both my legs started to dry up, itchiness is gone, and I can now use the different watches I want to wear with no wrist skin eruptions.

I don't think I will ever stop taking my daily dose of cellular zeolite. Even the scars on my legs are lightening up [so] that I could probably be able to wear shorts now. Thank you ... for introducing cellular zeolite; my skin problems are now things of the past.

SPIDER BITE

AGENT ORANGE EXPOSURE, MENTAL CLARITY, SPIDER BITE, HERPES SIMPLEX

Don K.
Florida

I took some liquid zeolite [cellular zeolite] at 4 pm. When I woke up the next morning, I had a mental clarity that I have never had before, and I still have it. I [was] ... exposed to Agent Orange about 30 years ago. Two nights later, I had a horrible taste in my mouth. The next morning, I noticed the tumor that was in my mouth for about four years was gone.

A brown recluse spider bit me between the toes 37 years ago. It left an ulcer like a cold sore that never healed, and I have had athlete's foot and other infections around it. On the fourth day, my foot started to itch, and when I looked at it I noticed the ulcer was gone.... Then a herpes cold sore started to form. It never actually went all the way, but went away and after that I noticed that the constant tension that I always had in my lip was also gone.

I have been exposed to stress since then that normally would bring on a cold sore, and no more have formed.

For years, I felt like something [was] wrong with my body. I no longer have that feeling. Instead I have an overall feeling of health. This stuff really works!

TOOTHACHE/GUM DISEASE

TOOTHACHE, GINGIVITIS

Denise Hy
Kauai, Hawaii

I have had gingivitis for some time. A few days ago, I had a bad toothache. I took a few Advil in the morning, but the pain was back by afternoon. Then I thought to drop the cellular zeolite onto the gum around the sore tooth. Within a few minutes, the toothache was gone, and it hasn't come back.

Varicose and Spider Veins

SPIDER VEINS

Linda Kapala
April 2006

Tonight I was listening to your call and, when the person talked about varicose and spider veins, I looked down at my ankles where I have a mass of spider veins that looks like a bruise. Well, I looked and my husband looked, and this mass of spider veins is almost completely gone [since I started taking cellular zeolite]. I'm also sleeping so much better since being on the product.

VIRAL AND OTHER INFECTIONS

SHINGLES

Linda Bryant
July 2005

I have suffered from shingles on and off for the last 33 years. About a month before the conference in Vegas, I had a very painful and severe outbreak. I started taking the [cellular zeolite] drops as recommended, three drops, three times a day. After doing this for three days, all the symptoms that I was suffering from disappeared!!! I am so excited about the cellular zeolite product, I can't wait to receive my shipment and start using it regularly.

GENITAL WARTS

Dr. France, D.C. (writing about a patient)
Clearwater, Florida

A 23-year-old woman, who has been a chiropractic patient of mine for three years, heard about the effects of liquid zeolite [cellular zeolite] and told me she had genital warts.

(These warts are known to be caused by a virus called HPV Papilloma virus, which is also known to cause cervical cancer). She had them burned, they came back, [and she] took medication and put medicated ointment on them without any change.

I told her she had nothing to lose by trying a liquid zeolite formula at 10 drops 3 times a day. One week later, she complained they were bigger and painful. I told her to increase the drops to 15 at three times a day; she did. I saw her the next week, but I forgot to inquire about them. The following week, I asked her, and she told me that last week she wanted to let me know but forgot. She had this big smile on her face and told me one morning she woke up and they were all gone!! Four weeks since then, and she is still free of them!

PLANTAR WARTS

Trudy Alexander
Montana

Another victory ... after taking the cellular zeolite drops for just two weeks, the six plantar wart seeds in the bottom of my foot migrated to the surface of the skin, and I simply peeled them off. No more pain, no more tenderness. The "holes" are mending, and the calluses are diminishing.

THROAT INFECTION

Kelley Spear
Hudson, Ohio

I had a very severe infection in my throat for which the doctors had me on antibiotics for five months. Unfortunately, not only did the medication fail to address the infection, it caused me to develop C-diff colitis, a dangerous gastro-intestinal problem. I was taken off the antibiotics and a couple of weeks later started to take the cellular zeolite 10 drops three times daily. Within four days, the terrible taste I had experienced from the infection was gone, and my doctor said that I should continue to take the cellular zeolite for four months. The infection was cleared, and I now take cellular zeolite as directed on the label as a preventive measure....

EAR INFECTION

During a trip to Iowa in May, I developed a viral infection behind my eardrum. Thinking it was just a cold, I did not go the doctor until mid-July, and was given a steroid and an antibiotic. My doctor believed that would clear it up in a few days, but it did not improve at all. In mid-August, I began using cellular zeolite. Within a few weeks, the symptoms of the infection were reduced dramatically and have continued to improve to where the symptoms are essentially gone. My wife and my two girls all use cellular zeolite to reduce toxins and carcinogens and for its anti-viral properties. What a great product.

HERPES, VIRAL FLU, DIARRHEA

Bob

Denver, Colorado

I have had three experiences attributed to cellular zeolite use:

1. Herpes Virus: The evening before our return to Denver from two weeks in Michigan on vacation, I noticed a breakout of the Herpes Simplex virus on my left cheek bone near my left eye. We were in the sun a lot on our vacation – playing golf, swimming at the lake, etc. – and sun is a stressor, which has caused breakouts in the past. I have had the virus in my system since about age eight. When I get a breakout, it normally takes two weeks or more for it to subside, and during that time I feel like I have mono – very tired. When we got back to Denver the next day, my initial order for cellular zeolite was here, and I started taking it immediately (which was 24 hours after the breakout). The cold- sore-like bump on my cheek bone went away within two days, and I did not have the mono-like feeling. This is the first time in over 50 years that I have had such rapid relief from a breakout.

2. Virus: My wife, daughter, and grandsons all came down with a 24-hour flu-like virus in early September. I was taking the cellular zeolite in a clean-out mode (10 drops 3 times per day for two weeks) and did not get the stomach ache and diarrhea that they got.

3. Diarrhea: A week ago, I had a half day when I hit the toilet a few times. I went back to 10 drops of cellular zeolite two times, and it stopped by the end of the day.

STAPH INFECTION ALONG WITH CROHN'S DISEASE

Britta Snow
Harriman, Tennessee

I have Crohn's disease, and have been very sick due to a staph infection. After only one week of taking cellular zeolite, my infection was almost completely cleared up. I was able to stop taking antibiotics, and I feel better than I have for months.

YEAST INFECTIONS

CANDIDA

Rodney L
Kauai, Hawaii

I have had candida since I was 17. I have gone on anti-candida diets, and used all kinds of products. Nothing really worked to get rid of this nuisance, which has plagued me now for over 25 years – until now! I have been taking cellular zeolite for three weeks now, and all my symptoms of candida are gone! I can't tell you how happy that makes me! I am not going to stop taking this stuff – ever.

FIBROMYALGIA, CANDIDA

Suzy S.

Kauai, Hawaii
April 2006

I am a Licensed Vocational Nurse, who ran a private care management service for seniors and family members for 25 years. It was a 24/7, high-stress, life-and-death nursing practice. I was diagnosed with fibromyalgia and high mercury levels four years ago. I was so bad, at my worst, that I got lost in my own neighborhood. That's how bad the effect of the mercury was. I was mapped by a rheumatologist in San Diego four years ago. I had 18 points. I had been helped by a holistic practitioner, whom I am very grateful to. I got all the mercury out of my teeth – correctly. I was on chlorella, changed all my personal care items to healthy ones, and sold my nursing business to reduce the stress in my life. However, my improvement had reached a plateau. I still had very low energy, and nothing seemed to change that.

I started cellular zeolite a month ago – 5 drops, 3 times a day. My goal was to get help with my fibromyalgia. I also had a high level of candida according to tests. In the last few weeks, I've noticed I have more energy, and I am thinking more clearly than I was. I think I'm more optimistic. I did experience some nausea in the first few days, which passed after a few days. I also realized I was dehydrated, though I thought I was drinking enough. Then I noticed that I had a lot more energy. Usually by 9 PM, I'd be done for the day. Now I'm painting in my studio at night. Before, I was too exhausted to do that. My sleep is better, and I'm dreaming more. I've had a lab test for neurotransmitters. This tells us whether there's a physical problem keeping us from sleeping. The doctor who read that test said there's no way I could be sleeping at night, according to my brain chemistry.

I started taking a supplement about five months ago with 5HTP, GABA, and thiamine to help my sleep. I still was having some sleep problems when I started cellular zeolite. My sleep has improved in the last few weeks since I've been taking cellular zeolite. I normally haven't been in pain for the last two years, though before then I had a lot of pain. In the past, however, whenever I would have a massage, I would have a lot of pain with pressure. I would literally kick the masseuse and scream. It's been probably about 20 years that I haven't been able to be touched deeply. Now, since I've been taking cellular zeolite, I can have a deep massage without any pain. I look forward to seeing what further improvements I'll experience. My latest stool test, which was approximately two weeks after starting cellular zeolite, had NO candida! This is the first time in years!!!! The other treatments were rough and not effective. My doctor was pleased and ... said for me to keep taking cellular zeolite! (Like I would stop!?)

Yeast Infection

Kris and Shawn Riedel (writing about a cousin)
September 2005

I have a cousin, Dan, who 25 years ago was in a coma for a month. During that time, he was given large quantities of antibiotics. Consequently, he developed a yeast infection. Over the years, he has tried numerous medications and diet changes, but nothing has helped. I just recently found out about the yeast infection and sent him a bottle of cellular zeolite with the instructions to try it and see what happens. After four days, he called and

said he was seeing an improvement and felt better than he has in years. Each day he is getting better. He loves this stuff, and this is what he says about it: "cellular zeolite has gotten me on the path to recovery with this yeast infection because nothing else has worked. I feel better already after four days on cellular zeolite. I am using nothing else, so I know it is cellular zeolite that is helping me...."
